## 3 Advisory

**The areas expected to receive more than 50 mm of weekly total rainfall have a** high risk of waterborne (e.g. diarrhea) and Vector borne (e.g. Malaria) diseases especially in areas with poor drainage. Residents are advised to be on the lookout for such diseases and take necessary action.

**The areas expected to experience more than 35°C** therefore high likelihood of skin diseases e.g. skin rash.

**The areas expected to experience less than 10°C** have a high likelihood of cold weather diseases. e.g. Asthma, pneumonia, common cold and flu. Residents are advised to be on the lookout for such diseases and take necessary action.

**Winds of more than 25 knots (12.9m/s)** have a high likelihood of cold and flu diseases due to blown dust especially during dry season.

**N.B: This forecast is to be used together with the daily (24-hour) forecast issued by this Department.**
