Biometeorological Services Division

WEEKLY BIOMETEOROLOGICAL BULLETIN (31ST JANUARY -6TH FEBRUARY 2023)

Ref No: KMD/MM/01-2023

Issue Date: 30/01/2023

1.0 PREAMBLE

Biometeorology is an interdisciplinary science of interactions between atmospheric processes and living organisms - plants, animals and human-beings. The Biometeorological Services Division collects, analyzes and interprets Meteorological and Health data in liaison with partners in the Health Sector for advisory development.

The weather information provided is aimed at guiding residents to identify and recognize the likelihood of occurrence of weather related health diseases according to the issued advisories and take necessary action.

REVIEW FOR LAST WEEK (23RD JANUARY -29TH JANUARY, 2023)

1.1 High Rainfall

This section lists stations recorded more than 50mm total rainfall in the last 7 days. All stations recorded total weekly rainfall less than 50mm.

1.2 High Temperatures

This section lists stations that recorded average temperatures exceeding 35°C in the last 7 days. This is shown in Table 1 below.

Table 1:

Station	Average weekly maximum temperature
Mandera Met	37.0°C
Wajir Met	36.7°C
Lodwar Met	36.1°C

1.3 Low Temperatures

This section lists stations that recorded average temperatures below 10°C in the last 7 days. This is shown in Table 2 below.

Table 2:

Station	Average weekly minimum temperature
----------------	---

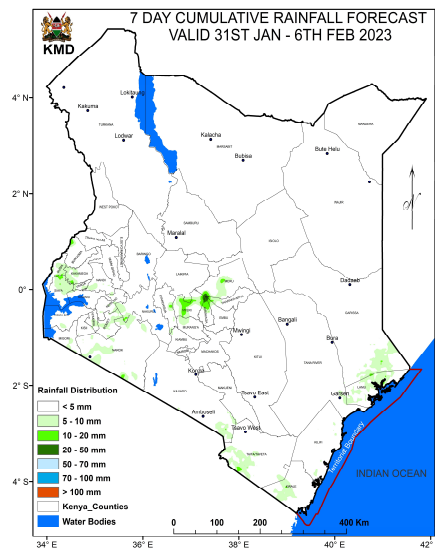

Nyahururu Met	5.7°C
Nyeri Met	7.9°C
Kabarak Met	7.9°C
Kericho Met	8.2°C
Laikipia Met	8.4°C
Narok Met	8.6°C
Eldoret A/port	9.2°C

1.4 High Winds

This section list stations that recorded winds with speeds of more than 25 knots (12.9 metres per sec) in the last 7 days. This was recorded in Marsabit, Voi and Mombasa met stations.

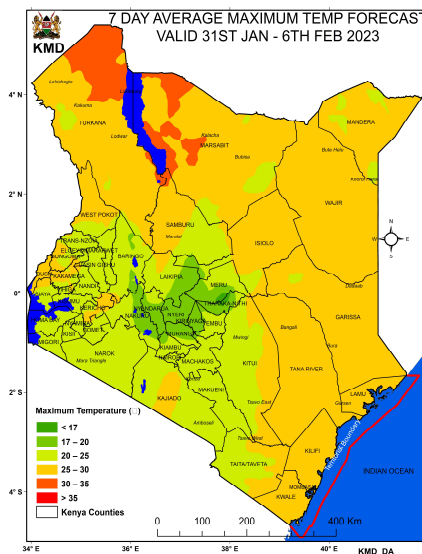

2.0 FORECAST FOR 31ST JANUARY -6TH FEBRUARY, 2023

a) Rainfall

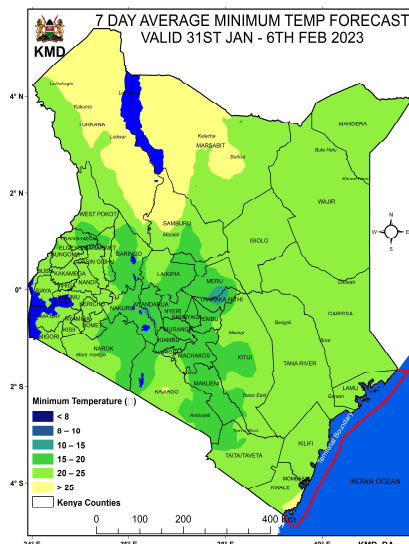

Rainfall less than 50mm is expected over parts of the Country (Tuesday 31st January, 2023 to Monday 6th February, 2023)

b) High Temperature

Maximum Temperatures of more than 35°C are expected over parts of Turkana, Mandera, Wajir and Garissa Counties during the forecast period (Tuesday 31st January, 2023 to Monday 6th February, 2023).

c) Low Temperature

Minimum temperature of less than 10°C is expected over parts of Nyandarua, Baringo, Kajiado, Nakuru, Narok and Kericho Counties, during the forecast period (Tuesday 31st January, 2023 to Monday 6th February, 2023).

d) Winds

Winds of more than 25 knots (12.9m/s) are expected over parts of Marsabit, Mandera, Lamu, Kajiado, Eldoret, Kisumu, Mombasa, Mtwapa, Msabaha, Malindi, Isiolo, Garissa, Wajir and Turkana Counties, during the forecast period (Tuesday 31st January 2023 to Monday 6th February, 2023)

3.0 Advisories

i) Areas expected to receive more than 50 mm of weekly total rainfall have a high likelihood of occurrence of waterborne diseases (e.g. diarrhea) and Vector borne diseases (e.g. Malaria), especially in areas with poor drainage. Residents are advised to be on the lookout for such diseases and take necessary action.

ii) Residents living in areas expected to experience temperatures of more than 35°C have a high risk of being infected with skin diseases e.g. skin rash.

iii) Areas expected to experience less than 10°C have a high likelihood of occurrence of cold weather diseases. e.g. Asthma, pneumonia, common cold and flu. Residents are advised to be on the lookout for such diseases and take necessary action.

iv) Winds of more than 25 knots (12.9m/s). These winds are strong enough and able to blow dust especially over bare grounds. The blown dust may increase the risk of respiratory infections e.g. cold and flu diseases. These diseases are quite common during the dry weather conditions. Residents are advised to be on the lookout for such diseases and take necessary protective measures.

N. B: This forecast is to be used together with the daily (24-hour) forecast issued by this Department.

Dr Gikungu

DIRECTOR OF KENYA METEOROLOGICAL DEPARTMENT
