

Kamusi ya Msamiati na Istilahi katika

Ripoti za Hali ya Hewa

**(Dictionary of Meteorological Terms used
in Weather Reports)**

Tafsiri kutoka Kiingereza hadi Kiswahili

Kenya Meteorological Department

Community of Taita
Taveta County

FOREWARD

The Kenya Meteorological Department (KMD) in partnership with the World Meteorological Organization (WMO), Food and Agriculture Organization of the United Nations (FAO), IGAD Climate Prediction and Applications Center (ICPAC), Adaptation Fund and the Local community in Taita Taveta County collaborated in the implementation of a three-year partnership program titled **Agricultural Climate Resilience Enhancement Initiative (ACREI)** from 2018 to 2021. The aim of the ACREI project was to “Develop and implement adaptation strategies and measures that will strengthen the resilience of vulnerable smallholder farmers, agro-pastoralists and pastoralists in the Horn of Africa to climate variability and change”.

To actualize the purpose of the ACREI project, the KMD and collaborators used Participatory Scenario Planning meetings (PSPs) to engage smallholder farmers, pastoralists and other stakeholders in Taita Taveta to strengthen their capacity to access weather and climate information; carry out collective interpretation and understanding of weather and climate forecasts and transforming them into locally relevant information and language for agricultural decision making. To support this objective, government ministries and agencies (Agriculture, Water, Disaster and others) and the media were also involved.

It is in this regard that the KMD in collaboration with the stakeholders undertook the task of translating some of the meteorological terms commonly used in weather forecast reports from English to Kiswahili, which is the national and local language spoken by most of the population in Kenya and the region. The purpose is principally to have a dictionary (**Kamusi** – means dictionary in Kiswahili) of meteorological terms to enhance access, use, uptake and adoption of locally relevant weather and climate information in Taita Taveta County. This dictionary will also be useful in guiding similar initiatives at the national and sub-national levels and provide the opportunity for similar translations of meteorological terms into other community languages to improve ownership, understanding and increased uptake and use of weather information mostly at the sub-national level.

On behalf of the Kenya Meteorological Department, I wish to appreciate all those who participated in the preparation and translation of the meteorological terms to Kiswahili to form this **Kamusi**. I wish to recognise the contributions of the following; Farmer Field School groups in Taita Taveta, Agriculture Department representative-Taita Taveta, Local FM Radio Stations (Mwanedu, Sifa, Msenangu, and Tumaini) and the KMD staff.

Specially, I wish to acknowledge all the translators and reviewers of the Kamusi for their time and valuable inputs without which this document would not be available for use.

Other translators:

1. Mary Githinji

2. Robinson Asira

3. Dr Pamela Kaithuru

4. Roger Ndichu

5. Japheth Migiro

6. Reginald Mahonga

7. Meshack Musyoki

Reviewers:

1. Linah Mwamachi - Radio Sifa

2. Sylvester Kituku - Radio Mwanedu

3. Donde Samora - Radio Tumaini

4. Rebecca Makeo - Radio Tumaini

5. Linda Akoth - Radio Sifa

6. Fatuma Rashid - Radio Msenangu

7. Ayub Shaka - Community representative

8. Ezekiel Muigai - KMD

9. Dr Margret Mwangi – KMD

10. Absae Sedah - KMD

11. Hannah Kimani - KMD

12. Bahati Musilu - KMD

13. Christine Maswi - KMD

Dr David Gikungu, PhD

Director of Meteorological Services and Permanent Representative of Kenya with the World Meteorological Organisation

2 | *Kamusi ya msamiati na istahili katika ripoti za hali ya hewa*

Term	English translation	Swahili translation
Above Normal rainfall	Rainfall amount that is more than the average (mean) amount as observed during the same time or period for the last 30 years or more.	Mvua ya kiwango cha juu ya kawaida au wastani kilichotokana na tathmini ya takwimu za mvua za miaka thelathini au zaidi iliopita
Agro meteorology	Agrometeorology is the study of weather and use of weather and climate information to enhance or expand agricultural crops or to increase crop production.	Somo la kisayansi linalohusika na maswala ya matumizi ya metiorolojia kwa kupanua na kuendeleza kilimo.
Air	Invisible gaseous substance surrounding the earth, mainly a mixture of oxygen and nitrogen.	Lundiko la hewa lililotapaka hewani na lenye hali sawa ya joto, unyevu na shinikizo la hewa.
Air mass	A widespread body of air with horizontally uniform temperature, humidity, and pressure.	Anga ambalo lina hewa inayozingira dunia au sayari zingine.
Agriculture	The science or practice of farming, including cultivation of the soil for the growing of crops and the rearing of animals to provide food, wool, and other products.	Kilimo. Kinahusika na kulima ardhi kwa upanzi wa mimea na ukuzaji wa Mifugo ili kukuza chakula, pamba na bidhaa zingine.
Anvil clouds	Cumulonimbus clouds.	Aina ya mawingu yaliyo na umbo la juu linalofanana na kilemba.
Atmosphere	The envelope of gases surrounding the earth or other planets.	Anga ambalo lina hewa inayozingira dunia au sayari zingine.
Anemometer	In meteorology, an anemometer (from 'wind' and 'measure') is a device that measures wind speed and direction. It is a common instrument used in weather stations.	Kifaa cha kupima mwendo kasi wa upepo.
Anabatic wind	Anabatic wind, also called upslope wind on mountains and hills caused by warming of the ground by the heat of the sun.	Upopo unaovuma kutoka bondeni na kuelekea juu (mlimani) na ambao unaoumbika kutoptana na miale ya jua kupasha joto kwenye uso wa ardhi
Analog Forecasting	Approach of forecasting, which uses previous weather and climate events to forecast the future. This method expects that the previous event mimicks similar event in future	Aina ya njia ya utabiri wa hali ya hewa unaotumia takwimu za hali ya hewa kitambo ili kutabiri hali ya hewa ya siku zijazo. Njia hii ya utabiri huchukulia kwamba hali ya hewa ijayo itachukua mwelekeo sawa na wa hali hewa ya wakati uliopita
Anemometer	In meteorology, an anemometer (from 'wind' and 'measure') is a device that measures wind speed and direction. It is a common instrument used in weather stations.	Kifaa cha kupima mwendo kasi na mwelekeo wa upepo.
Arabian High-Pressure System	The high-pressure system situated in the Arabian/Tibetan highland region and is mostly responsible for north eastern wind flow into East African region.	Mfumo wa hali ya hewa wenye shinikizo la juu na ambao uko maeneo ya milima ya Tibetan kule bara la Asia na mara nyingi huhushishwa na upopo mkavu unaotoka kaskazini mashariki na kuingia maeneo ya Afrika ya Mashariki.

Atlantic Ocean	The ocean that lies between Europe and Africa on the East and North and South America on the west. It is divided by the equator into the North Atlantic and the South Atlantic oceans.	Bahari ya Atlantiki. Inapatikana kati ya bara Uropa na Afrika kwa upande wa mashariki na Marekani kwa upande wa magharibi. Imegawanyika sehemu mbili –Atlantiki ya kaskazini na kusini.
Atmospheric circulation	Is a large-scale movement of air and together with ocean circulation causes thermal energy to be redistributed on the surface of the Earth.	Ni mzunguko mkubwa wa hewa ukiungamanishwa na ule mzunguko wa maji ya bahari unaosababisha kusambazwa kwa nguvu za jua duniani.
Atmospheric/Air pressure	Also referred to as barometric pressure, (after the barometer) is the pressure within the atmosphere of Earth where the standard atmosphere is a unit of pressure defined in >1000 Hpa and equal to 760 mm Hg, of mercury column.	Shinikizo ya hewa ambayo hupimwa kwa kutumia kifaa kijulikanacho kama barometra (kipimahewa). Shinikizo la anga ni kanieneo ya hewa kwenye nchi ambayo hupimwa kimo cha juu ya 1000 Hpa ambayo ni sawa na kimo cha miligramu 760 ya zebaki (mercury).
Azores high pressure system	Azores high is a subtropical high-pressure system that extends over the eastern subtropical North Atlantic and western Europe during winter. It is associated with anticyclonic winds in the subtropical North Atlantic.	Mfumo wa hali ya hewa wenye shinikizo la juu la hewa linalopatikana Kaskazini mashariki ya bahari ya Atlantiki na magharibi ya Uropa. Mfumo huu unahusishwa na pepo zinazo zunguka tokea mashariki kwenda magharibi.
Barometer	An instrument measuring atmospheric pressure, used especially in forecasting the weather and determining altitude.	Kifaa cha kupima shinikizo ya hewa.
Below Normal rainfall	Lower than the average (mean) rainfall amount as observed during the same time or period for the last 30 years or more.	Mvua ya kiwango cha chini ya kawaida/wastani.
Breeze	Any generally light wind or local-scale air movement that is convectively forced.	Upopo wowote unauvuma ukiwa umetulia na hasa hushinikizwa na nguvu za miale ya juu.
Broken clouds	Clouds which cover between 6/10 and 9/10 of the sky.	Mawingu ambayo yanagubika sehemu kubwa ya Anga km kati ya 6/10 hadi 9/10.
Carbon sinks	A carbon sink is anything, natural or otherwise, that accumulates or extracts and stores some carbon from a source (e.g. atmosphere) for an indefinite period of time and thereby removes carbon dioxide (CO ₂) from the atmosphere.	Kitu chochote, asili au cha kujiumbia ambacho kinazoa, kurudisha Pamoja au kuhifadhi gesi ya Carbon dioxide kwa muda mrefu na hivyo kuondoa gesi hii kutoka anga hewa. Km. misitu, bahari na vinginevyo ni baadhi tu ya vitu vinavyoweza kupunguza gesi hii kutoka anga hewa.
Chemical precipitation	Rainfall formed through the process of converting solution of chemical substances into insoluble form or making the solution a super saturated one. Chemical precipitation is the most common technology used to remove dissolved metals from solutions e.g., process of cleaning wastewaters containing toxic metals.	Mvua inayo umbika kutokana na mchakato wa kubadilika kwa vitu vyenye kemikali na kusababisha maji yaliyo na ugumu wa kumumunyika. Mchakato huu ndio unaotumika kuondoa chemikali za chuma zilizo changanyikana na maji na vitu vingine. Aidha inatumika kusafisha maji taka.
Cirrus clouds	Cirrus are wispy clouds made of long strands of ice crystals that are described as feathery, hair-like, or layered in appearance.	Mawingu mepesi yenye umbo ya uzi ndefu yenye chepechepe za barafu na hufananishwa na manyoya.

Climate	The weather variability or conditions prevailing in a region or area in general over a long period of time.	Hali ya hewa inayo tambulisha sehemu fulani kwa muda mrefu. Inatathminiwa kutoka kwa vipimo vya mvua, joto, upemo na viashiria vingine kwa muda mrefu.
Climate change	Commonly, climate change indicates increase in surface temperature leading to global warming and its effects on Earth's climate system over a long period of time and is primarily caused by anthropogenic factors primarily release of green house gases in the atmosphere.	Mabadiliko ya tabia nchi na kwa kawaida huashiria kupanda kwa hali ya joto ambayo inaadhiri hali ya hewa ya ulimwengu baada ya muda mrefu na hasa husababishwa na tabia ya binadamu ya matumizi ya ufuta unaovukisha gesi chafu angani.
Climate hazards	Weather-related, hydrometeorological events which can cause harm to humans, property, livelihoods, resources, and the environment. Climatic hazards are also sometimes called extreme weather events.	Majanga yanayohusishwa na matukio ya hali ya hewa na ambayo husababisha athari kwa watu, maisha, rasilimali na mazingira.
Climate Information Services	Climate Information Services (CIS) are services that entail the dissemination of climate data in a way that aids people and organizations in making decisions associated with a changing and unpredictable climate.	Huduma za hali ya hewa zinazohusika na uandaaji, utabiri na usambazaji na upashaji wa repoti na takwimu za hali ya hewa ili kuwawezesha watu na mashirika kuchukua hatua stahiki kuhusiana na hali ya hewa tarajiwa. Mifumo ya hali ya hewa ambayo hutumia kanuni za hisabati au mlingano na kutumika katika kutabiri hali ya anga/hewa.
Climate models	Systems that use mathematical equations to characterize how energy and matter interact in different parts of the ocean, atmosphere and land and used in forecasting the state of the atmosphere.	Kubadilika badilika kwa viwango vya viashiria vya hali ya hewa (km. joto na mvua) ikilinganishwa na viwango vya wastani. Somo la sayansi linalohusika na maswala ya hali ya hewa na ambayo hutambulisha hali ya hewa ya muda mrefu ya sehemu Fulani. Ugeuzo wa hali ya mawingu ili yawewe kuzalisha mvua zaidi kwa kutumia ujuzi wa kemikali ndani ya hewa. Hali hii huwezesha mfinyazo wa unyevunyevu kwenye mawingu ili kuumba mvua.
Cloud seeding	Modification of weather and particularly related to clouds in order to generate precipitation that falls from clouds by adding chemical substances into the air to enhance cloud condensation or ice nuclei.	Hali ya mawingu angani.
Cloudy	Condition of cloud cover in the atmosphere /sky.	Nyanda za pwani.
Coastal plains	A coastal plain is a flat, low-lying piece of land next to the ocean.	Mfumo au mkusanyiko wa maneno, sarufi, maumbo au takwimu ili kuficha maana halisi ya jambo na zinatumika ili kuweka siri.
Codes	A system of words, letters, figures, or other symbols substituted for other words, letters, etc., especially for the purposes of secrecy.	Msimu wa - au kipupwe cha baridi na ambacho kinatambulishwa na viwango vya chini vya joto ikilinganishwa na msimu mwengine k.m. msimu wa baridi kule Uropa au joto katika Juni – Agosti katika ukanda wa Afrika mashariki.
Cold Season	The coldest period (season) with the lowest temperatures compared to other periods of the year e.g., Winter in Europe or the period between June and August in East Africa.	

Communication	The various methods of sending information between people and places, especially through phones, computers, radio, etc.	Njia mbalimbali za kutuma habari kati ya watu na pia sehemu kwa kupitia matumizi ya simu, kompyuta, radio nk.
Condensation	Condensation is the process of water vapor turning into liquid water, such as in clouds which give rain in the atmosphere. This process leads to water droplets accumulating (clouds) and once they are heavy enough, they form and fall down as rain.	Mchakato wa mvuke au unyevunyevu kugeuka na kuwa maji katika anga, au mawinguni na husababisha mvua. Mchakato huu husababisha majimaji kulundikana na yakiwa mengi na mazito hunyesha mvua.
Condensation level	The atmospheric level at which condensation occurs as a result of convection, the lifting of air (e.g., orographic lifting).	Anga pale ambapo mchakato wa kuumba mvua hufanyika kwa sababu ya joto, na hali hii husababisha kuinuka kwa mshikano wa hewa tokea chini kupanda juu.
Convection	In weather, convection is the process through which heat and moisture are transported vertically in the atmosphere by the movement of a fluid (e.g., air) by updrafts and downdrafts in an unstable atmosphere.	Katika maswala ya hali ya hewa, msamiati huu unaelezea mchakato wa jinsi joto na unyevu unavyo safirishwa kwenda juu hewani kwa kupanda na kushuka kati angahewa iliyo thabiti.
Convergence	The term is used to refer specifically to the horizontal inflow (convergence) where horizontal winds cause air to rise.	Msamiati unaotumika kuonyesha hali ya kuvuma kwa upemo unaokutana katika sehemu moja na kusababisha kupaa juu kwa hewa.
Cross winds	A wind blowing across one's direction of travel (perpendicular to the line of travel).	Aina ya upemo unaovuma ukifuata upande mmoja sawa na mahali kitu kinapoeleke (km, Ndege).
Cumulonimbus clouds	Genus of clouds, dense towering vertical cloud associated with thunderstorms and atmospheric instability.	Aina ya mawingu mazito angani na yenye urefu mkubwa ikilinganishwa na upana wake juu angani na ambayo huleta mvua na ngurumo ya radi.
Cumulus clouds	Cloud forming rounded masses heaped on each other above a flat base at fairly low altitude.	Aina ya mawingu yanayolundikana na kupandiana angani na kukalia sehemu iliyo usawa na yako juu karibia kilomita mbili tokea ardhini.
Dam	A barrier constructed to hold back water and raise its level, forming a reservoir used to generate electricity or as a water supply.	Bwawa. Jengo ambalo hutumika kuzalisha umeme na kuhifadhi na kusambaza maji.
Data transmission	Is the process of sending digital or analog data over a communication medium to one or more networks, communication or electronic devices.	Ni mfumo ama njia ya usambazaji wa data ya kidijitali au isiyo ya kidijitali kupitia njia ya mawasiliano kwa mojawapo ya mtandao au kifaa cha elektroniki.
Deforestation	Deforestation or forest clearance is the removal of a forest or stand of trees from land that is then converted to non-forest use.	Tendo la kuondoa misitu au kukata miti katika msitu ili kutoa nafasi ya ardhi itumike kwa mambo mengine yasiyo husu misitu.
Dekadal Agro weather forecast.	Agricultural weather forecast which is normally provided to farmers to help in agricultural planning.	Utabiri wa hali ya hewa wa siku kumi na ambao ni maalum wa kuarifu maswala ya kilimo. Utabiri huu huonyesha hali inayotarajiwa kwa viashiria fulani muhimu kwa kushauri shughuli za kilimo.

Dew	Condensed moisture in the air which forms into droplets of water on the ground at night. Dew is a useful source of moisture for plants.	Umande au matone ya maji ambayo huonekana mida ya usiku na asubuhi mapema juu ya ardhi au sakafu nyingine kama vile juu ya majani au nyasi na paa.
Dew point temperature	Temperature at which air becomes saturated with water vapour, when it is cooled without changing its pressure or vapour content.	Hali ya joto inayosababisha maji kugeuka na kuwa barafu.
Dissemination	Process or act of sharing information such as weather forecast. The word dissemination pre-supposes that there is no feedback.	Usambazaji wa habari au ripoti kama vile utabiri wa hali ya hewa.
Diurnal temp range	The temperature difference between the minimum at night (low) and the maximum during the day (high).	Tofauti ya kiwango cha joto cha chini kabisa (huwa usiku) na kile cha juu zaidi (huwa mchana).
Divergence	In meteorology, divergence is the accumulation or drawing a part of air, as well as the rate at which each takes place due to pressure differences.	Muachano. Katika metiorolojia hii ni sehemu yenye muachano pale pepo za hulka mbili au zaidi zinafuma kwa pande tofauti kutokana na shinikizo la hewa.
Drizzle	Light rain falling in very fine drops.	Mvua nyepesi au manyunu yanayodondoka kutoka juu na yenye matone madogo mno.
Drought	Abnormally dry weather in a region over an extended period that causes water shortages, pasture shortages and crop damage. Some rain may fall during a drought, but it will be less than usual.	Hali ya ukame katika sehemu kwa muda mrefu na ambayo husababisha ukosefu au kupungua kwa maji, lishe na uharibifu wa mimea. Mvua ikinyesha kipindi cha ukame, huwa ni chini ya kiwango cha kawaida.
Dry bulb Thermometers	Instrument that measures the temperature of air measured by a thermometer freely exposed to the air, but shielded from radiation and moisture.	Kifaa cha kupima kiwango cha joto na ambacho kinawekwa uwazi na kimezimikwa na kitambaa kilicholowa maji. Upepo hupitishwa kwenye unyevu huo kabla vipimo kurekodiwa. Unyevu unapovikia asilimia mia moja, ujoto huwa umelingana na ule wa hewa kavu (joto la kawaida). Kipindi kirefu na cha siku au wiki kadhaa ndani ya msimu wa mvua pale ambapo hamna mvua yoyote imenesha. Hali hii huenda ikaathiri mimea na kusababisha kukauka kwa chemichemi za maji.
Dry spell	An unusual long period of several days or weeks during the rainy season when no rainfall occurs. A prolonged dry spell may damage crops and cause water sources to dry up.	Kipindi kirefu na cha siku au wiki kadhaa ndani ya msimu wa mvua pale ambapo hamna mvua yoyote imenesha. Hali hii huenda ikaathiri mimea na kusababisha kukauka kwa chemichemi za maji.
Dust Devils	This are strong surface to near-surface short-lived whirlwinds that range from half a metre wide and high to more than 10 metres wide and taller. Its movement is both horizontal with a vertical upward motion.	Upepo wa muda mfupi wenyewe nguvu na unaovuma ardhini au karibu na ardhi na kufikia mita mbili kwa upana na kimo cha mita kumi au zaidi. Pepo hizi zinafurugika na kusonga kutoka sehemu moja ya mlalo ardhini hadi nyingine na pia ukipaa juu.
Earth quake	A rapid and violent shaking of the ground which can result in great destruction and damages and is caused by movements within the earth's crust or a volcanic eruption.	Tetemeko la ghafla na lenye vurugu kwenye ardhi na ambalo linaweza kuleta uharibifu na maangamizi. Husababisha na msukosuko ndani ya ardhi au mlipuko wa volcano.
East	This is one of the four cardinal directions of the compass points that are used to define the location of an area or point. East denotes the eastern	Mashariki. Mojawapo wa majina yanayotumika kuonyesha sehemu yoyote kwenye ramani ya nchi.

Easterly wind	part of a specific point or area, and country etc.	
El Nino	A wind that comes from the east. The unusual warming of the surface waters of the Pacific Ocean along the coast of South America. This causes changes in weather patterns across the globe. In Kenya, El Nino increases the likelihood of heavy rainfall, especially during the October, November and December rainy season.	Upopo unaovuma kutoka mashariki. Hali ya ujoto wa maji ya bahari katika bahari ya Pasifiki ya kati inayopakana na pwani ya Marekani ya kusini na inajulikana kama 'El Nino'. Hali hii hubadilisha mwelekeo wa hali ya hewa katika maeneo mengi duniani. Katika nchi ya Kenya, El Nino husababisha uwezekano wa mvua kubwa kunyia hasa katika msimu wa Vuli (Oktoba-Disemba). Umeme au tukio linalohusika na kuwepo kwa nguvu za umeme
Electricity	Physical phenomena associated with the presence and flow of electric charge.	Ni mchakato wa kubadilisha data kutoka mpangilio mmoja hadi mwingine ili kuwezesha hiyo data kutumika kwa kufanikisha mahitaji mbalimbali km kubadilisha maandishi kuwa na umbo la kidijitali.
Encoding	The process of converting data into a format required for a number of information processing needs, including: converting text, characters or symbols to digital format.	Ni mraba mwembamba au mstari unaofikiriwa Kuwepo na unaochorwa kuzunguka dunia na kuigawanya vipande viwili vinavyotoshana-au sehemu ya kaskazini na ya kusini. Pepo kutoka sehemu hizi mbili hukutana hapa. Kifaa kinachotumika kuhifadhi maji yanayotumika kwa upimaji wa uvukizaji katika eneo Fulani.
Equator	A narrow band or imaginary line drawn around the earth and dividing the earth equally into northern and southern hemispheres. Winds from the two hemispheres converge at the equator.	Mchakato wa maji kuingia angani yakiwa mvuke. Mchakato huu pia unajulikana kama uvukizaji na hufanyika haraka pale ambapo viwango vya joto huwa ni vya juu na unyevu nyevu mdogo na upopo.
Evaporation pan	Is an instrument that is used to hold water during observations for the determination of the quantity of evaporation at a given location measure.	Kinachotarajiwa. Utafsiri au uchanganuzi wa kitaalam.
Evaporation	The process of liquid water becoming absorbed into the air as water vapour. Evaporation speeds up when temperatures are high, when humidity is low and when there is wind.	Maeneo kwenye ramani yaliyo baada ya mraba wa nyuzi 30 tokea ikweta.
Expected Expert Interpretation	Anticipated or likely to happen. Interpretation of weather information such as a forecast by a professional and expert in the field.	Hali ya hewa yenye makali zaidi, na isiyo ya msimu au sehemu tu na hasa inapohushishwa na athari za mabadiliko ya hali ya hewa.
Extra Tropics	The middle latitudes beyond the tropics.	Sehemu chache. Katika utabiri, msamiati huu hutumika kumaanisha uwezekano wa tukio la hali ya hewa k.m. mvua, mawingu n.k, katika sehemu isiyozidi asilimia 33 ya sehemu nzima.
Extreme Weather Events	Weather events that are very harsh, unseasonal, or typical for a particular region, especially when attributed to the effects of climate change.	Mafuriko ya ghafla yanayotokea katika sehemu ambazo kwa kawaida ni kavu na zenye miundo msingi duni. Mafuriko haya yanaweza kutokea muda mfupi baada ya mvua nzito kunyesha. Mara nyingine mafuriko ya namna hii hutokea up the valley.
Few places	In a given forecast, this term is used to refer to the probability of occurrence of a weather event e.g., rainfall, cloudy etc over an area not exceeding 33% of the total area.	
Flash floods	Sudden floods occurring in an area that is normally dry and with poor drainage. They can appear within hours of heavy rainfall; sometimes flash floods occur in dry weather after it has rained further up the valley.	

Flood	Weather phenomenon often caused by rivers bursting their banks after heavy rain. When the sluice gates of dams are opened to release water and when heavy rain falls on city streets and cannot drain away.	katika msimu wa ukame na baada ya mvua katika nyanda za juu. Mafuriko. Hali ya athari ya hewa inayoletwa na mvua kubwa inayofuja kingo za mito. Hali hii Wakati mwingine hutokea maji yakifunguliwa kutoka kwenye mabwawa ya kuhifadhi maji yaliyo maeneo ya juu.
Flood plain	Flat land by a river that often becomes covered by water when the river rises and bursts its banks.	Sehemu tambarare na inayopakana na mto na hufurika maji pale mto unapojaa na kufuja kingo zake.
Fog	Ground level cloud that reduces visibility to less than 1km. Fog lowers the air temperature and provides moisture to plants.	Ukungu au aina ya mawingu meupe ambayo yanakaribia au kugusa ardhi na hupunguza uwezo wa kuona mbali hata kufikia chini ya kilomita moja. Ukungu hupunguza kiwango cha joto kwenye hewa na pia huchangia unyevunyevu kwa mimea. Hali ya ukungu katika hewa na ambayo inahusishwa na mawingu yaliyo karibia ardhini na amabayo yanapunguza uwezo wa kuona mbali kufikia chini ya kilomita moja.
Foggy	A type of weather associated with ground level cloudiness that reduces visibility to less than 1km.	Tabiri au kadiria tukio au jambo litakalotokea usoni. Hali ya baridi kali isiyo ya kawaida na inayosababisha mimea kuwa na umbo la kuchomeka na kunyauka hasa kwenye majani.
Forecast	Predict or estimate a future event or occurrence.	Mfumo unaotumiwa kutengeneza, kutathmini na kubuni ramani kwa kutumia takwimu na data zingine.
Frost	A deposit of small white ice crystals formed on the ground or other surfaces when the temperature falls below freezing point.	Mchakato wa kuumbika kwa barafu juu ya milima, au hali ya_kufunikizwa kwa ardhi na barafu. Lundiko la barafu au mto ulio na barafu uliosababishwa na kukusanyika kwa theluji juu ya milima.
Geographical Information system	A geographic information system (GIS) is a system that creates, manages, analyzes, and maps all types of data. GIS connects data to a map, integrating location data with all types of descriptive information.	Hali ya kuongezeka kwa viwango vyatoto angani (duniani) inayohusishwa na ongezeko la viwango vyatoto juu vyatoto gesi chafuzi ya carbon dioxide na zingine angani.
Glaciation	Process of making glaciers, or result of being covered by glaciers or masses of ice; the result of glacial action.	Aina ya gesi zilizomo hewani kama vile CO ₂ na ambazo hufungia na kuhifadhi ujoto wa miale ya jua na hivi kusababisha viwango vyatoto angani.
Glaciers	Slowly moving mass or river of ice formed by the accumulation and compaction of snow on mountains or near the poles.	Vipande vidogo vyatoto barafu kutoka kwa wingu na mara nyingine tokeaa wingu lenye Dhoruba.
Global Warming	A gradual increase in the overall temperature of the earth's atmosphere generally attributed to the greenhouse effect caused by increased levels of carbon dioxide, chlorofluorocarbons, and other pollutants.	
Green House gases	(GHG or GhG) is a gas that absorbs and emits radiant energy at thermal infrared wavelengths, causing the greenhouse effect. e.g., carbon dioxide and chlorofluorocarbons.	
Hail	Small lumps of ice that fall from clouds sometimes during thunderstorms.	

Hailstones	Hail is a form of solid precipitation. It consists of balls or irregular lumps of ice, each of which is called a hailstone. Hail growth is greatly inhibited during low surface temperatures.	Mvua ya mawe au barafu. Hutokea kama vipande au lundiko la barafu. Kukuwa kwa mvua hii hulemazwa wakati wa viwango vya chini nya joto.
Hailstorms	Weather event associated with rain drops that freeze to form pellets of ice that fall from the sky. Hail storms can damage crops.	Dhoruba ya mvua inayo shuka kwa matone ya barafu na yenye mfano wa mawe kutoka angani. Hujulikana sana kama mvua ya mawe. Dhoruba hii inaweza kuharibu mimea. Utabiri wa janga la hali ya hewa.
Hazard forecasts	Hazard forecasts provide information on the physical event characteristics, such as the location, timing, and magnitude of a potentially damaging event. We consider events as natural phenomena with a specific magnitude that unfold with a given space-time footprint and with the potential for adverse consequences.	
Haze	A slight obscuration of the lower atmosphere, typically caused by fine suspended particles.	Hali ya kutoona vizuri na mbali hewani kwa sababu ya kuwepo kwa vumbi na vichafuzi vingine.
Head wind	A wind that blows in the opposite (against) direction of travel of an object.	Upepo unaovuma kinyume na Mwelekeo wa kitu fulani, kwa mfano ndege ikipaa angani kuelekeea sehemu Fulani.
Heatwave	A heat wave is a period of unusually hot weather that typically lasts two or more days. To be considered a heat wave, the temperatures have to be outside the historical averages for a given area.	Kipindi cha halijoto ambayo si ya kawaida na inayoweza kudumu kwa siku mbili au zaidi. Ili hali hii ya ujoto kudhirika, ni lazima viwango vya joto viwe zaidi ya vile vya kawaida katika vipimo vya kihistoria katika eneo.
Heavy rains	Rainfall of high intensity.	Mvua yenye uzito mkubwa.
High Clouds	Clouds that occur above about 20,000 feet in the atmosphere.	Mawingu yaliyo juu mno na zaidi ya fiti 20,000 angani.
High Pressure System	This is a weather feature characterized by dense air mass normally cooler and drier than the surrounding air. Areas under high pressure system experience fair weather.	Mfumo wa shinikizo ya hewa au kanieneo ya hewa ya juu na ambaa unahusishwa na hewa nzito na ilioyo baridi na kavu ikilinganishwa na hewa inayoizunguka. Sehemu zenye mfumo huu wa hali ya hewa hushuhudia hali ya hewa ilioyo shwari.
High Tide	Condition of very high-water waves that move through the oceans/sea in response to the forces exerted by the moon and sun and the waves moving toward the coastlines.	Hali ya kujaa kwa mawimbi ya maji ya bahari kwa kiwango cha juu kuendana na msukumo wa nguvu za mwezi na jua na mawimbi haya yanaenda yakikaribia kingo za pwani/bahari.
Highlands	An area of high or mountainous land.	Sehemu za miinuko. K.m., Nyanda za juu.
Humidity	The level of moisture in the air. It is usually expressed as the percentage of air saturated with water. High moisture in the air reduces the rate of soil evaporation.	Kiwango cha unyevunyevu kilichokoo katika hewa ikipimwa kama asilimia ya hewa iliyolowa maji. Kiwango cha juu cha unyevunyevu angani hupunguza mvukizo kutoka kwenye udongo.
Hydrology	The branch of science concerned with the properties of the earth's water, and especially its movement in relation to land.	Haidrolojia. Sayansi inayoshughulikia mfumo na masuala ya maji.

Hygrometer	An instrument for measuring the humidity of the air or a gas.	Kifaa kinachopima unyevunyevu kwenye hewa.
Ice	Frozen water that has a solid form. Ice occurs when water cools below temperature of 0°C (32°F).	Barafu au maji yaliyo geuka na kuwa barafu. Barafu huumbika pale maji yanapokuwa baridi chini ya ujoto wa nyusi 0°C.
Icing	It is any deposit or coating of ice on an object, caused by the impingement and freezing of liquid (usually supercooled) and results from the deposition of water vapor.	Lundiko lolote la barafu juu ya sakafu au kitu lililo sababishwa na kuganda kwa maji kutokana na mvuke (wa maji).
Indian Ocean	An ocean in the south of India that extends from the eastern coast of Africa to the East Indies and Australia.	Bahari inayoanzia kusini ya India hadi maeneo ya pwani ya Afrika mashariki na kutanda hadi Pwani ya bara/nchi ya Australia. Hujulikana pia kama Bonde la Ufa.
Indian Ocean Dipole	Denoted as IOD and is an irregular oscillation of sea surface temperatures in which the western Indian Ocean becomes alternately warmer (positive phase) and then colder (negative phase) than the eastern part of the ocean. Sometimes the IOD brings more rainfall across East Africa.	Tabia ya kubadilika badilika kwa joto katika bahari ya hindi ya magharibi (kipindi cha mvua) ikilinganishwa na hali ya baridi katika maeneo ya bahari ya hindi ya mashariki. Kiashiria hiki mara nyingine huleta mvua nyingi katika afrika ya mashariki.
Indigenous forecast	Forecasts that are based on observed bio-physical factors (livestock, insects, birds, trees and wildlife), perceptions, information and behaviors to make predictions about future and current weather.	Utabiri wa hali ya hewa wa sasa na siku zizazo na unoaoandaliwa kwa kutumia viashiria vya mazingira na visababishi vingine kama vile tabia za wanyama, wadudu na mimea.
Insolation	Solar radiation that has been received on a horizontal surface.	Mnururisho kutokana na juu ambao unafika kwenye uso wa ardhi.
Inter-Tropical Convergence zone (ITCZ)	The region where the northeasterly and southeasterly trade winds converge, forming an often-continuous band of clouds or thunderstorms near the equator.	Ni sehemu ya mfumo wa hewa ambapo pepo zinazovuma kutoka Kaskazini mashariki hukutana na zile zinazotoka kusini mashariki na mara nyingi kusababisha Kuwepo kwa mraba wa mawingu au tufani.
Inversion	In meteorology, refers to the behavior in the atmospheric layer when the air temperature increases with altitude as opposed to the reverse.	Katika fani ya metiorolojia, msamiati huu hutumika kuonyesha tabia ya kuongezeka kwa hali ya joto kama upandavyo juu hewani. Hii ni kinyume na tabia ya kiwango cha joto kupungua kama mtu anavyo panda juu hewani.
Isolated showers	Isolated showers are those that affect a small area approximately 5% or less.	Mvua chache na inayotarajiwa kunyesha katika maeneo machache tu yanayofikia asilimia 5 au chini ya asilimia 5.
Jet stream	Is a weather feature in the atmosphere that is narrow and fast flowing in meandering air currents flowing from west to east in some parts of Earth and other planets. They are normally located near the altitude of the tropopause.	Mfumo mwembamba wa hewa kwenye anga na ambao unavuma kombokombo kutoka magharibi hadi mashariki ya sehemu fulani za dunia. Mfumo huu hasa huwa karibu na sehemu ya anga ilijukanayo kama tropopause.

Katabatic wind	A katabatic wind (named from 'descent') is a drainage wind, a wind that carries high-density air from a higher elevation down a slope under the force of gravity.	Upepo unaovuma kutoka juu (mlima) na kushuka/kuelekea chini (bondeni).
La Nina	A widespread cooling of the surface waters of the eastern Pacific Ocean off the coast of South America. It is the opposite of El Nino. In Kenya, La Nina is often associated with depressed rainfall in October, November and December, followed by dry/drought conditions.	Hali ya ubaridi ya maji katika Pasifikasi ya Mashariki inayopakana na pwani ya Marekani ya kusini na inayo julikana kama 'La Nina'. Ni hali kinyume na ile ya El Nino na nchini Kenya huhuishwa na mvua finyo katika msimu wa Vuli, na kufuatiwa na hali ya ukame.
Lake Victoria	The largest lake in Africa, Uganda and Tanzania and bordering on Kenya, drained by the Nile River.	Ziwa lililo kubwa zaidi barani Afrika, na linajumulisha Uganda, Tanzania na Kenya, na linatiririsha maji yake katika mto Nile.
Land breeze	A breeze/wind blowing toward the sea from the land, especially at night, owing to the relative warmth of the sea.	Upepo unaovuma kutoka baharini na kuelekea nchi kavu na hasa usiku kutokana na hali ya joto kwenye Bahari.
Latent Heat	Latent heat (also known as latent energy or heat of transformation) is energy released or absorbed, by a body or a thermodynamic system, during a constant-temperature process — usually a first-order phase transition.	Ni aina ya nishati inayotoka au kuingia kwenye mfumo au kitu baada ya kiwango fulani cha joto kisicho pungua kuwepo.
Latitude	The angular distance of a place north or south of the earth's equator, or of a celestial object north or south of the celestial equator.	Umbali wa eneo au mahali kutoka kaskazini au kusini ya ikweta.
Lee-ward	Situated on or toward the side sheltered from the wind; downwind.	Upande ule mwengine usioangalizana na upepo. Upande wa upepo shuka.
Light rains	Rainfall of minimal intensity.	Manyunu au mvua nyepesi.
Lightning	The occurrence of a natural electrical discharge of very short duration and high voltage between a cloud and the ground or within a cloud, accompanied by a bright flash and typically also thunder.	Radi au tukio lenye umeme wa muda mfupi na wa nguvu za juu unaotoka kwa wingu na kufika ardhini, na huandamanishwa na mwangaza mwangi wa ghafla na wakati mwengine ngurumo ya radi.
Long rains	Refers to March-May rainfall season.	Ni msimu wa mvua wa Machi hadi Mei au msimu wa masika.
Long range forecast	A forecast for a period greater than seven days in advance.	Utabiri wa hali ya hewa ambao unanuiwa kutoa matarajio ya hali ya hewa zaidi ya siku saba zijazo.
Longitude	Geographic coordinate that specifies the east-west position of a point on the Earth's surface.	Kiratibu cha jiografia kinachotambulisha eneo kwenye ramani aidha iko mashariki au magharibi.
Low Clouds	Clouds occurring below 6500 feet, and normally consist of liquid water droplets or even supercooled droplets. The two main types of low clouds include stratus and cumulus.	Aina ya mawingu yaliyo fiti 6500 juu angani ambayo yana chembechembe za maji baridi zaidi. Aina mbili za mawingu haya ni 'stratus' na 'cumulus'

Low Pressure System	This is a weather feature characterized by less dense air mass that is normally wetter and warmer than the surrounding air. Areas under low pressure system experience cloudy or wet weather.	Mfumo wa shinikizo ya hewa au kanieneo ya hewa ya chini na amba o unahusishwa na hewa nyepesi na iliyo na joto na unyevunyevu ikilinganishwa na hewa inayoizunguka. Sehemu zenye mfumo huu wa hali ya hewa hushuhudia hali ya mawingu na hata mvua. Hali ya maji ya bahari kujaa na kupwa kwa kiwango cha chini.
Low tide	Low tide corresponds to the lowest part of the wave, or its trough. The difference in height between the high tide and the low tide is called the tidal range.	
Lowlands	Low lying areas or regions such as the coastal areas.	Sehemu zilizo chini kama vile maeneo ya pwani.
Marine forecast	Is the forecast of future weather conditions over the Earth's oceans.	Utabiri maalum wa hali ya hewa katika maeneo ya baharini.
Mascarene high pressure system	Is a high-pressure area located between 20°S–40°S and 45°E–100°E near the Mascarene Islands in the Southern Indian Ocean.	Mfumo wa hali ya hewa unaopatikana bahari ya hindi ya kusini na wenyen shinikizo ya juu.
Maximum Temperature	Is the temperature used to describe the highest temperature expected or recorded over a specific period of time – usually 24 hours.	Hali joto ya juu zaidi inayotarajiwa au iliyorekodiwa ndani ya muda fulani—mara nyingi katika masaa ishirini na nne.
One (1) mm of rainfall.	One millimetre of rain corresponds to 1 litre per square metre of water on the surface, or approximately 10 millimetres of snow.	Kipimo cha milimita moja (1) ya mvua ni sawa na lita moja (1) ya maji katika sehemu ya ukubwa wa mraba mita moja kwenye sakafu, au mili lita kumi (10) ya theluji. Mawingu yaliyo angani umbali wa kati ya fiti 6000 (kilomita 1.8) na fiti 20000 (kilomita 6). Mfano ni mawingu yajulikanayo kama ‘altocumulus’ na ‘altocirrus’
Medium Clouds	Clouds at medium heights, which occur between 6000 (approximately 1.8 km) and 20,000 ft (6 km). Examples are altocumulus and altocirrus clouds.	Utabiri wa hali ya hewa ambao unanuiwa kutoa matarajio ya hali ya hewa ya siku tatu hadi siku saba (wiki moja) zizazo.
Medium range forecast	A forecast for a period extending from about three days to seven days in advance.	Ripoti fupi na maalum ya muonekano wa hali ya hewa na amba o hutumika sana na marubani wa Ndege na watabiri wa hali ya hewa.
METAR Weather report	A format of weather report mostly used by aircraft pilots and by meteorologists.	Hali joto ya chini zaidi inayotarajiwa au iliyorekodiwa ndani ya muda fulani—mara nyingi katika masaa ishirini na nne.
Minimum Temperature	Is the temperature used to describe the lowest temperature expected or recorded over a specific period of time – usually 24 hours.	
Mist	A cloud of tiny water droplets suspended in the atmosphere at or near the earth's surface that limits visibility (to a lesser extent than fog; strictly, with visibility remaining above 1 km).	Wingu la chepechepe za maji zilizo elea hewani au karibia uso wa ardhi na amba o hupunguza uwezo wa kuona vizuri kwa uwazi (sawia na ukungu, na umbali wa kuona ni kama kilomita moja).
Mobile phone	A telephone with access to a cellular radio system so it can be used over a wide area, without a physical connection to a network.	Simu ya rununu au rukono ambayo inatumia mfumo wa redio ili kuweza kutumika katika maeneo makubwa bila ya kuwa na muunganisho wa moja kwa moja na mtandao.

Moderate rains	Rainfall of less intensity.	Mvua yenyé uzito wa wastani.
Monsoon	A seasonal prevailing wind in the region of South and Southeast Asia, blowing from the southwest between May and September and bringing rain (the wet monsoon), or from the northeast between October and April (the dry monsoon).	Upepo wa msimu katika maeneo ya kusini na kusini mashariki ya bara Asia, na ambao huvuma kutoka kusini magharibi kati ya mwezi wa mei na Septemba na kusababisha mvua. Unapovuma kutoka kaskazini mashariki kati ya mwezi wa Oktoba na Aprili, upepo huu hauleti mvua.
Monthly forecast	A weather forecast given or updated at a monthly period and gives expected weather in next one month.	Utabiri wa hali ya hewa wa mwezi mmoja na ambao hutolewa kuonyesha matarajio ya hali ya hewa kwa mwezi mzima ujao.
Moon	Terrestrial body of the Solar system. Also known as the earth's only natural Satellite visible at night, by reflected light from the sun.	Mwezi. Gimba la angani na ambalo ni sehemu ya sayari juu. Ni mwanga wa asili wa setilaiti unaoangaza usiku kutokana na kumulikwa na Jua.
Most places	In a given forecast, this term is used to refer to the probability of occurrence of a weather event e.g., rainfall, cloudy etc in an area larger than 66% of the total area.	Sehemu nyingi. Katika utabiri, msamiati huu hutumika kumaanisha uwezekano wa tukio la hali ya hewa k.m. mvua, mawingu n.k, kwenye sehemu ya ukubwa wa zaidi ya asilimia 66 ya sehemu nzima.
National Meteorological Centre	It is a center for national weather forecasting, climate prediction, climate change study, meteorological information collection and dissemination	Kituo cha kitaifa cha Metiorolojia kinachohisika na maswala ya utabiri wa hali ya hewa, mabadiliko ya hali ya hewa, usambasaji na utoaji wa taarifa za hali ya hewa, vipimo vya viashiria vya hali ya hewa.
Near Normal	The average (mean) rainfall amount as observed during the same time or period for the last 30 years or more.	Mvua ya kiwango cha wastani kulingana na tathmini ya mvua zilizo rekodiwa katika miaka 30 au zaidi iliyopita.
North	This is one of the four cardinal directions of the compass points that are used to define the location of an area or point. North denotes the northern part of a specific point or area, and country etc.	Kaskazini. Mojawapo ya majina yanayotumika kuonyesha sehemu yoyote kwenye ramani ya nchi.
North East	Also denoted NE, is the point of the horizon midway between north and east.	Kaskazini mashariki na ambayo ni sehemu iliyoko kati ya kaskazini na mashariki
North West,	Also denoted NW, is the point of the horizon midway between north and west.	Kaskazini magharibi na ambayo ni sehemu uliyoko kati ya kaskazini na magharibi
North westerly	A wind that comes from the north west.	Upepo unaovuma kutoka Kaskazini magharibi.
Northerly wind	A wind that comes from the north; for example, the northerly winds from Arabian deserts signal a change in the weather to drier conditions.	Upepo unaovuma kutoka kaskazini. Kwa mfano upepo unaovuma kutoka Kaskazini hutoka jangwa la Uarabuni na huashiria Kuwepo kwa hali ya ukavu.
Nowcasting	Nowcasting is a detailed analysis and description of the current weather and the forecasting ahead for a period from 0 to 6 hours.	Tathmini na maelezo ya hali ya hewa ya sasa hivi na utabiri wa hali ya hewa unaotarajiwa baada ya muda mfupi kuanzia sasa hadi baada ya masaa 6.
Numerical Weather Prediction	A method of weather forecasting that employs a set of equations that	Ni njia maalum ya kisayansi ya kutabiri hali ya hewa kwa Kutumia milingano au mifumo ya

	describe the flow of fluids and processes in the atmosphere.	hisabati kutathmini na kutafsiri viashiria na michakato ya anga.
Orographic rainfall	Which is also called relief precipitation, is the precipitation that is generated by a forced upward movement of air upon a physiographic upland encounter.	Mvua inayotokana na sehemu zenyenye miinuko kama vile milima na vilima.
Outlook	A generalized weather prediction for a specific region over a longer period, often days to weeks ahead.	Angalizo la hali ya hewa la eneo fulani la kipindi kirefu ambacho kwa mara nyingi huwa ni cha muda wa siku kadhaa hadi wiki kadhaa zijazo Hali ya anga nzima kugubikwa au kufunikwa na mawingu meusi.
Overcast	Of the sky or weather marked by a covering of gray clouds; dull.	Ozoni au hewa isiyo safi yenye harufu kali inayotokana na gesi ya oksijeni kutokana na miale mikali ya jua. Inapatikana katika sehemu ya anga ya juu na huzuia miale mikali ya jua kufikia ardhini.
Ozone(O ₃)	A colorless toxic sharp smelling gas with a pungent odour formed from oxygen by electrical discharges or ultraviolet light. It is normally in plentiful in the outer atmosphere and prevents the ultra violet rays of the sun from reaching the earth.	
Ozone Layer	A layer of ozone molecules in the Earth's stratosphere that absorbs much of the Sun's harmful ultraviolet (UV) radiation.	Utandu au safu ya chembe chembe za ozoni katika anga hewa ambaa hufyonza mionzi/miale mikali/hatari ya jua ijulikanayo kama 'ultraviolet (UV)'.
Pacific Ocean	The largest of the world's oceans. It lies between America on the east and Asia and Australia on the west.	Bahari ya Pasifikasi ni bahari iliyo kubwa kuliko zingine zote duniani na ambayo iko kati ya Marekani kwa upande wa mashariki na bara Asia na Australia kwa upande wa magharibi. Hali ya mawingu kiasi –huenda pia ikawa na maana ya vipindi vifupi vyaya jua. Awamu za mwezi. Kuna awamu 8 za mwezi huwa ambazo zinaonyesha tabia tofauti tofauti km awamu mpya, kwanza, awamu pungufu, n.k.
Partly Cloudy	Partial cloud cover in the atmosphere /sky.	
Phases of the moon	The eight distinct phases of the moon which shows different characteristic such as new, waxing crescent, first quarter, waxing gibbous, full, waning gibbous, last quarter, and waning crescent.	
Poor rains	Little rainfall over a season mostly below the expected amount.	Mvua duni au ya kiwango cha chini ya kile cha kawaida katika msimu.
Precipitation	This is any form of moisture from the process of condensation of atmospheric water vapor or clouds which falls down due to gravitational pull. The forms of precipitation consist of drizzle, rain, sleet, snow, ice pellets and hail.	Aina yoyote ya mvua kutokana na unyevunyevu katika anga au mawingu na ambayo inanyesha kutokana na mvuto au gravity ya ardhini. Mvua hizi ni kama vile manyunu, mvua ya mawe, mvua yenye ngurumo na radi, barafu na nyinginez.
Pressure Gradient	The rate of change of atmospheric pressure with distance, indicating the strength and direction of winds.	Kiwango cha mabadiliko ya shinikizo la angahewa kwa umbali, kinachoonyesha nguvu na mwelekeo wa upepo.
Prevailing Winds	The most common direction from which the wind blows in a particular area over an extended period.	Upande ambaa upepe hutokea na kuvuma kwa mara nyingi kwa eneo fulani na kwa muda mrefu
Probability	The likelihood that an expected event will actually occur. Weather forecasters sometimes only can indicate the degree	Ewezekano kwamba jambo fulani litatendeka.

	of probability that a forecast event will happen.	Wataalamu wa hali ya hewa huenda wakatoa tu utabiri unaonyesha uwezekano wa tokeo fulani la hali ya hewa.
Radar	A system for detecting the presence, direction, distant objects (e.g., aircraft) and determining their position, velocity, or other characteristics by analysis of sent radio waves (usually microwaves) reflected from their surfaces.	Chombo kinachotumika kugundua kuweko kwa kitu, umbali wa kitu (km Ndege), mwendo, na hali zingine kwa Kutathmini wimbi la taarifa au tarakimu zinazo dhamiriwa kutoka kwa kitu hicho.
Radio sonde	Equipment containing weather sensors that measure different atmospheric parameters such as wind speed and direction, temperature, atmospheric pressure among others as it ascends into the atmosphere.	Kifaa maalum kinachopima hali ya hewa angani kama vile hali ya mwendo na Mwelekeo wa upepo, hali joto, uzito wa msukumo wa hewa na viashiria vingine huku ikipanda juu anagani/hewani.
Radiation Fog	Fog that forms at night when the ground loses heat by radiation, cooling the air above it to the dew point.	Ukungu unao umbika nyakati za usiku baada ya ardhii kupoteza ujoto wake na hapo kupelekea hewa angani kuwa na umanda.
Radiometer Solarimeter	An instrument for detecting or measuring the intensity or force of radiation.	Kifaa kinachotumika kutanzua au kupima nguvu za miale ya juu.
Rain	Water droplets falling from clouds and reaching the ground, often associated with wet weather.	Matone ya maji yanayoshuka kutoka kwenye mawingu hadi ardhini na kwa mara nyingi huhushisha na hali ya mvua
Rain gauge	An instrument used to measure the amount of rain that has fallen during a period of 24 hours. The standard rain gauge is a round cylinder, usually made of metal, with a funnel at the top to catch rain water.	Kifaa kinachotumika kupima kiwango cha mvua iliyonyesha kadri ya masaa 24. Kifaa hiki kwa kawaida ni silinda iliyoduara, hutengenezwa kwa chuma, na ina faneli juu ili kunasa maji ya mvua.
Rainbow	A rainbow is an optical phenomenon that can occur under certain meteorological conditions. It is caused by reflection, refraction and dispersion of light in water droplets resulting in an effect similar to a spectrum of light appearing in the sky.	Upinde wa mvua. Ni tukio au kitu kinachoumbika kutokana na hali fulani ya hewa na miale ya juu kumulika na kutawanya matone ya maji (unyevunyevu) hewani na kusababisha kuwepo kwa upinde wenye rangi nyingi.
Rainfall Amount	The amount of water falling in rain, snow, etc., within a given time and area, usually expressed as a hypothetical depth of coverage.	Kiwango cha maji tokea kwa mvua, theluji n.k. kwa muda fulani na sehemu na mara nyingi hutathminiwa sawa na ukubwa wa sehemu iliyopokea mvua.
Rainfall Cessation	The time or date when the seasonal rains are expected to stop.	Tarehe au wakati mvua ya msimu inatarajiwa kukoma.
Rainfall distribution	Refers to how rainfall amounts are spread over time and space.	Mgao wa mvua mara nyingi kwa wakati na kimaeneo.
Rainfall onset	The time or date when the first significant rainfall comes at start of the rainy season.	Tarehe au wakati mvua ya msimu inapoanzia.
Rainy Resilience (To climate change impact)	A time/situation with rainfall. State of being able to cope with climate change impact.	Hali ya mvua. Hali ya kuwa na ustahimilivu au ustadi dhidi ya athari za mabadiliko ya hali ya hewa.

Relative Humidity	The amount of moisture in the air compared to the maximum amount the air could hold at that temperature, expressed as a percentage.	Kiwango cha unyevu katika hewa ikilinganishwa na kiwango cha juu zaidi cha unyevu ambacho hewa inaweza kuthibiti katika hali ya joto ya wakati huo
Ridge	An elongated area of high pressure in the atmosphere often associated with fair weather	Sehemu refu yenye shinikizo ya hewa ya juu katika anga na mara nyingi huhusishwa na hali ya hewa iliyo sawa.
Rift Valley	A large elongated depression with steep walls formed by the downward displacement of a block of the earth's surface between fault systems.	Bonde kubwa ambalo ni refu na lenye kina kirefu, na lilifanyika kwa mabadiliko ya mifumo ya chini ya ardhi.
Rising Air	Air that is moving upward in the atmosphere due to factors such as heating and convection	Hewa inayovuma ikienda juu kwenye angahewa kwa sababu kama vile ujoto wa miale ya juu.
Route forecast	Also codenamed as ROFOR, is an aviation weather forecast to guide pilots on the air routes being followed to a given destination.	Ni Utabiri maalum au ripoti ya hali ya hewa inayotumika na marubani wa ndege na huonyesha hali ya hewa tokea sehemu hadi mwisho wa safari. Mfumo wa setilaiti ambao unazunguka dunia na sayari zingine na kufuatilia na kutoa taswira na picha ya vitu mbalimbali ikiwa ni pamoja na viashiria vya hali ya hewa k.m mawingu.
Satellite system	A satellite system is a set of gravitationally bound objects in orbit around a planetary mass and used to monitor and map the earth and other objects including weather parameters e.g., clouds.	Hali ya hewa yenye uwezo wa kuhifadhi kiasi cha juu zaidi cha mvuke katika hali ya joto ya wakati huo na kusababisha kuumbika kwa unyevu unaofikia asilimia 100. Mvua iliyotapakaa na inayotarajiwa kuonyesha katika asilimia 10-50 ya eneo (km Nairobi).
Saturation	The condition in which the air is holding the maximum amount of water vapor it can at a given temperature, leading to a relative humidity of 100%	
Scattered showers	Scattered showers are rain showers expected only to affect 10-50% of the named area (e.g., Nairobi).	
Sea breeze	A breeze blowing toward the land from the sea, especially during the day owing to the relative warmth of the land. Temperature measured at the water surface (sea, ocean).	Upepo unaovuma kutoka nchi kavu na kuelekea baharini na hasa mchana kutokana na hali ya joto kwenye nchi. Joto katika bahari inayorekodiwa juu ya uso wa maji ya Bahari.
Sea Level	The average level of the surface of the ocean, used as a reference point for measuring elevation on land.	Kiwango cha wastani cha uso wa bahari, kinachotumiwa kama kipimo cha kurejelea kwa kupima urefu wa ardhi.
Seasonal Changes	Shifts in climate conditions, temperature, and weather patterns that occur with the changing of seasons	Mabadiliko katika hali ya hewa, joto, na muundo wa hali ya hewa yanayotokea wakati wa mabadiliko ya misimu.
Seasonal Forecast	Predictions of weather for upto 1 month or more (mostly upto 6 months) period.	Utabiri wa hali ya hewa wa msimu na amba ni wa mwezi mmoja (huenda hata ukafikia miezi sita).
Seasons	Each of different climatic periods of the year (spring, summer, autumn, and winter) marked by particular weather patterns and times, and linked with the	Vipindi au misimu tofauti tofauti vya hali ya hewa katika mwaka (kiangazi kifupi, Masika, Kipupupwe/baridi, Vuli) na ambayo inatambulishwa na hali ya hewa na nyakati

Several places	earth's changing position with regard to the sun.	kulingana na kubadiilika kwa nafasi ya dunia na sura ya juu.
Severe Weather	In a given forecast, this term is used to refer to the probability of occurrence of a weather event e.g., rainfall, cloudy etc over an area between 33% and 66% of the total area.	Sehemu kadha. Katika utabiri, msamiati huu hutumika kumaanisha uwezekano wa tukio la hali ya hewa k.m. mvua, mawingu n.k, kwenye sehemu ya ukubwa kati ya asilimia 33 na 66 ya sehemu nzima.
Short /long wave radiation	Extreme weather conditions which exceed the expected normal weather conditions and often have negative impact on people and property.	Hali mbaya ya hewa inayozidi hali ya hewa ya kawaida na yenye makali na athari kwa binadamu na mali.
Short rains	One of the radiations from the sun.	Mionzi ya juu ya kina kidogo au kile kikubwa.
Short range forecast	Refers to October to December rainfall season.	Ni msimu wa mvua wa Oktoba hadi Disemba au msimu wa vuli.
Showers	A weather forecast made for a time period generally not greater than 48 hours in advance.	Utabiri wa hali ya hewa wa muda mfupi unaonuiwa kutoa matarajio ya hali ya hewa kwa muda usiozidi masaa 48 yajayo.
Sinking winds	Showers are heavy than usual precipitaion characterized by the suddenness with which they start and stop, and by the rapid changes of intensity, and usually by rapid changes in the appearance of the sky.	Mvua nzito kuliko ya kawaida ambayo inahuishwa na kusitisha.
Sky	A downburst or sinking air that after hitting the surface spreads out in all directions and capable of causing damage.	Pepo shuka ambazo baada ya kufika juu ya ardhi hutapakaa pande zote na zina uwezo wa kuleta athari.
Sky clear	The sky is an unobstructed view upward from the surface of the Earth. It includes the atmosphere and outer space.	Ni sehemu iliyo juu ijulikanayo kama anga. Inajumuisha angahewa na anga ya juu Zaidi.
Smog	A sky free of clouds and other obscuration as observed from the point of observation.	Anga wazi bila mawingu wala kitu kingine chochote ikitazamwa tokea sehemu ya chini.
SMS	A type of air pollution that results from a combination of pollutants, often including ground-level ozone and particulate matter.	Aina ya uchafuzi wa hewa unaotokana na vichafuzi mbalimbali, ambavyo kwa mara nyingi hujumuisha gezi ya ozoni na vichafusi vingine
Snow	Short messaging service is a system that enables mobile phone users to send and receive text messages.	Huduma ya mawasiliano ya jumbe fupi na ambao hufanyika kwa simu za mkononi kutuma au kupokea ujumbe.
Soil moisture	Atmospheric water vapor frozen into ice crystals and falling in light white flakes or lying on the ground as a white layer.	Majimaji katika anga hewa na ambayo yamegeuzwa kuwa barafu na kudondoka toka angani kwa mfano wa vipande vyeupe au kutanda ardhini kama safu. Unyevunyevu ulio udongoni.
Solar Radiation	Soil moisture is the water content of the soil.	Mnururisho au mvuke unaotokana na juu na aina nyingine ya mionzi ya umeme.
	It is the energy emitted by the Sun in interplanetary space. When we speak about the amount of solar energy reaching the surface of our planet, we use irradiance and irradiation concepts.	

South	This is one of the four cardinal directions of the compass points that are used to define the location of an area or point. South denotes the southern part of a specific point or area, and country etc.	Kusini. Mojawapo ya majina yanayotumika kuonyesha sehemu yoyote kwenye ramani ya nchi.
South East	Also denoted SW, is the point of the horizon midway between south and east.	Kusini mashariki.
South West	Also denoted SE, is the point of the horizon midway between south and west.	Kusini magharibi.
South westerly	A wind that comes from the south west.	Upepo unaovuma kutoka kusini magharibi.
Southerly wind	A wind that comes from the south.	Upepo unaovuma kutoka kusini.
Spatial	Relating to or occupying space.	Msamiati unaohusishwa na nafasi au kuchukua nafasi/sehemu.
Spatial Weather Maps	Simple representation of the weather patterns on earth surface, showing the locations and movements of different weather systems such as pressure pattern, fronts, wind direction and speed, and how these will change in future.	Ramani za hali ya hewa zinazo onyeshwa sehemu na mifumo ya hali ya hewa kwenye uso wa nchi kama vile mwenendo wa shinikizo la hewa, mwelekeo na mwendo wa upepo, sehemu za ubaridi na jinsi hali hizi huenda zikabadilika katika siku zijazo.
St Helena	A weather system in the Atlantic Ocean associated with high pressure and influences the weather of Africa.	Mfumo wa hali ya hewa unaojulikana kama 'St Helena' kwenye bahari ya Atlantiki na unaohusishwa na hali ya msukumo wa juu wa hewa na unaoadhiri hali ya hewa barani Africa. Dhoruba kali inayotambulishwa na pepo zenye nguvu angani na hali ya mvua, ngurumo, radi au theluji
Storms	A violent disturbance of the atmosphere with strong winds and usually rain, thunder, lightning, or snow.	Mawingu ya safu yenyenye kimo cha chini ambayo mara nyingi yanafunikiza anga na yanaweza kugubika nchi na kusababisha mvua nyepesi.
Stratus Cloud	Low-altitude, layered clouds that often cover the sky like a blanket and can bring overcast conditions and light precipitation	Ni mojawapo ya mfumo katikati ya sayari zake na hujulikana kama jua. Jua hutoa mnururisho hasa mwangaza, miale mikali na ni chanzo cha nishati.
Sun	The Sun is the star at the center of the Solar System. It radiates energy mainly as light, ultraviolet, and infrared radiation, and is the most important source of energy for life on Earth.	Asubuhi wakati ambaao jua linachomoza, pia mawio.
Sun rise	The time in the morning when the sun appears or full daylight arrives.	Jioni wakati ambaao jua linatua, pia machweo.
Sun Set	The time in the evening when the sun disappears or daylight fades.	Vipindi vifupi vya jua (bila mawingu) muda wa mchana.
Sunny Intervals	Periodic breaks of sunny conditions (without cloud) during the day.	Kifaa kinachotumika kupima urefu wa vipindi vya jua na pale ambapo miale ya jua inathihihikira.
Sunshine recorder	An instrument that measures the periods or number of hours when the sun rays are present.	Upepo unaovuma karibu na ardhi. Mwendo wa upepo hupimwa kwa Kutumia kifaa kijulikanacho kama 'anomometer' na upande unaovuma hupimwa na 'wind vane' mita kumi tokea usawa wa ardhi.
Surface winds	Wind that blows near the earth surface. Normally it is measured using an anemometer for wind speed and wind vane for wind direction at a standard height of 10 m above the ground.	

SYNOP	SYNOP stands for surface synoptic observations and is a code used by WMO to report weather observations from manned and automated weather stations. The SYNOP reports are transmitted after every 6 hours. Relating to time.	Ripoti za vipimo vya hali ya hewa kutoka vituo vya upimaji vya kusimamiwa na vile vya kuijendesha. Ripoti hizi hutolewa baada ya kila saa sita.
Synoptic Scale	Atmospheric features or patterns that cover a large geographic area, typically ranging from a few hundred to thousands of kilometers.	Ni viashiria au miundo ya angani inayo eneo kwenye sehemu kubwa ya ardhi, hasa yenye ukubwa kuanzia sehemu ya kilomita mia na hata maelfu
Stevenson Screen	An instrument shelter used to protect meteorological instruments from direct sunlight and precipitation while allowing for air circulation.	Chumba maalum kilichojengwa ili kuhifadhi na kuzuia uharibifu wa vifaa vya kupima viashiria mbalimbali vya hali ya hewa kutokana na miale ya juu na hali ya mvua.
Temporal	Relating to time	Kuhusiani na wakati.
Thermometers	An instrument to measure temperature. Weather forecasts express temperature in degrees centigrade. 0 Centigrade is the temperature at which water freezes to become ice, 100 Centigrade is the boiling point of water.	kifaa cha kupima kiwango cha joto. Utabiri wa hali ya hewa huonyesha joto kwa nyuzi. 0 sentigredi ni hali ya joto ambayo maji huganda kuwa barafu. Kwa upande mwingine, 100 sentigredi ni kiwango cha mchemko.
Thunderbolt	A flash of lightning with a simultaneous crash of thunder.	Mwangaza wa radi unaotoka pamoja na ngurumo.
Thunderstorm	A strong and short-lived weather disturbance linked to cumulonimbus type of clouds and associated with lightning, thunder, dense clouds, heavy rain or hail, and strong gusty winds. The rains are associated with period of high temperature and humidity in the atmosphere.	Mvua yenye nguvu na ya muda mfupi inayohusishwa na ngurumo na radi, mawingu mazito meusi, mvua nyingi au barafu na upepo wenye nguvu. Mvua hii hushuhudiwa hasa nyakati au msimu wenye joto na hewa yenye unyevunyevu mwingi.
Tide	Feature formed by the rise and fall of sea levels which are associated with and caused by joint effects of the gravitational forces from the Moon, Sun, and the Earth's rotation.	Hali inayo sababishwa na kupanda na kushuka kwa usawa wa bahari unaohusishwa na kusababishwa na nguvu za mwezi, juu, na mzunguko wa sayari ya dunia.
Tides	Rise and fall of sea levels caused by the combined effects of the gravitational forces exerted by the Moon and the Sun and the rotation of the Earth.	Hali ya maji ya bahari kujaa na kupwa kwa kiwangofulani. Pia hujulikana kama mawimbi ya Bahari.
Tornado	A potentially violent and destructive whirling wind system of atmospheric circulation, characterized by a long, funnel-shaped cloud normally originating from the ocean.	Dhoruba kali na inayoleta uharibifu na inayotambulishwa na mfumo wa pepo zinazozunguka angani na mara nyingi huanzia baharini.
Towering Cumulus	When a cumulus cloud is much taller than it is wide, it is often called a towering cumulus (TCU) cloud.	Aina ya mawingu yanayolundikana na kupandiana angani na yenye urefu mkubwa ikilinganishwa na upana wake juu angani na huashiria kuumbika na kugeuka kuwa

Tremor	A relatively small or short-lived movement of the earth's surface caused by the same forces that produce earthquakes.	mawingu yanayoleta mvua na ngurumo ya radi.
Tropical cyclones	Is a fast-spiraling storm system over subtropical waters and with a low-pressure center It is an atmospheric circulation associated with strong winds and thunderstorms and produce heavy rainfall.	Kibunga au tufani. Mfumo wa hali ya hewa wenye upepo mkali na unaozunguka na kusonga juu ya bahari na wenye shinikizo la hewa ya chini. Pia husababisha mvua nzito, ngurumo na radi.
Tropics	The parallel of latitude 23°26' north (tropic of Cancer) or south (tropic of Capricorn) of the equator.	Sehemu ya tropiki ya Kaskazini au kusini na inayotambulishwa kwenye mstari ulio nyusi 23.5 mbali na Ikweta.
Tropopause	This is a boundary in the atmosphere between the troposphere and the stratosphere and located at average height of 17 Km above the surface in equatorial regions but less over other regions away from the equator.	Ni mpaka angani ambao unagawanya anga la chini na lile la juu na uko kilomita 17 angani juu ya maeneo ya ikweta na chini ya hapo katika maeneo yaliyo mbali na ikweta.
Troposphere	The lowest area of the atmosphere, extending from the earth's surface to about 6–10 km and contains 75% of the total mass of the planetary atmosphere and 99% of water vapor and aerosols, and is where most weather phenomena occur.	Angatropo. Ni sehemu ya anga iliyo chini ya anga kuu karibia kilomita 6-10 tokea uso wa dunia na nafasi ya asilimia 75(%) ya angahewa na hubeba asilimia 99(%) ya unyevu na vumbi/ukungu na ndiyo sehemu mwenendo wa hali ya hewa hutokea.
Tsunami	High sea wave caused by an earthquake, submarine landslide, or other disturbance:	Mawimbi makubwa na makali yanayosababisha na tetemeko la ardhi ndani ya bahari, maporomoko ya mfumo mwengine wowote
Turbulence	This is a weather feature characterized by irregular movement of the air in the atmosphere and resulting from eddies and vertical currents. It is often the one that causes bumpy conditions/feeling when the airplane passes through an area with the turbulence.	Huu ni msukosuko wa hali ya hewa unaotambulika kwa harakati isiyo ya kawaida katika anga. Mara nyingi ndio inayosababisha hali/hisia ya mdundo wakati ndege inapita kwenye eneo lenye msukosuko angani.
Upper air winds	Winds measure at a higher altitude or height above the earth surface generally 2000 feet or more above the surface.	Upepo unaovuma katika sehemu iliyo juu ya ardhi na hasa angani karibia fiti 2000 au zaidi juu ya uso wa dunia.
Very Heavy rains	Rainfall of extremely high intensity.	Mvua yenye uzito mkubwa Zaidi.
Visibility	Visibility is a measure of the horizontal opacity of the atmosphere at the point of observation and is expressed in terms of the horizontal distance at which a person should be able to see and identify.	Ni hali ya uwezo wa kuona /kutoona mbali na kwa uwazi/vizuri katika upeo wa anga ikiangaliwa kwa mstari wa mlalo. Hali hii hupimwa kulingana na umbali wa mtu kuona na kutambua jambo/kitu.

Warning	An urgent message advising that severe weather is likely to occur soon which may endanger life or damage property.	Ujumbe wa dharura na unaotoa tahadhari ya hali ya hewa yenye makali na ambayo huenda ikahatarisha Maisha ya watu au uharibifu wa mali.
Weather	The state of the atmosphere at a place and time as regards temperature conditions, wind, pressure, fog, cloudiness, rainfall, etc.	Hali ya hewa. hutambulishwa na viashiria vya anga/hewa kama vile hali joto, upepo, uzito wa hewa, mvuke, hali ya mawingu, mvua na vinginevyo.
Weather Advisory	Special weather information provided for early warning and requires special attention and response.	Ushauri wa hali ya hewa na ambao kwa mara nyingi hutolewa kipindi chenye hali ya hewa dharura inayohitaji hatua mwafaka kuchukuliwa. Pia inajulikana kama angalizo. Tahathari ya hali ya hewa ya dharura na ambayo hutolewa kwa sehemu wanamoishi Jamii ilhali athari tarajiwa huwa Majanga kama vile mafuriko ya ghafla.
Weather Alerts	A weather alert is a warning generally issued to more local areas mostly to communities about expected severe weather such as flash floods.	Usahilaji wa hali ya hewa kutoka sehemu kubwa (nchi nzima) kwa kutumia mbinu za kisayansi ili kuwezesha hali ya hewa kujulikana mahususi katika sehemu ndogo (wadi au kijiji).
Weather Downscaling	Downscaling is any procedure to infer high-resolution information from low-resolution variables. This technique is based on dynamical or statistical approaches commonly used in several disciplines, especially meteorology, climatology and remote sensing.	
Weather messages	Is information on weather and packaged in short coded or uncoded texts and describing or giving the expected weather conditions.	Ni taarifa ya hali ya hewa na ambayo imeandaliwa kwa nambari zilizo fiche au maandishi yanayo elezea hali ya hewa inayotarajiwa.
Weather Modification	Is the process of intentionally altering the weather so that it provides suitable outcome such as more rainfall. One of the common forms of weather modification is cloud seeding, which increases rain or snow to improve water supply or availability.	Ugeuzo wa makusudi wa hali ya hewa ili kuleta hali inayofaa kuboresha tukio la hali ya hewa kama vile Kuwepo kwa mvua. Moja wapo ya ugeuzo huu ni ule wa kubadilisha hali ya mawingu ili kuongeza kiwango cha mvua na hivyo kuwepo kwa maji ya matumizi mbalimbali.
Weather Uptake	Action of making use of weather information.	Hali ya upokeleaji na matumizi ya ripoti ya hali ya hewa.
Weekly Forecast West	Weather prediction that covers a period of 5-7 days This is one of the four cardinal directions of the compass points that are used to define the location of an area or point. West denotes the western part of a specific point or area, and country etc.	Utabiri wa hali ya hewa wa siku tano au saba zizazo. Magharibi. Mojawapo ya majina yanayotumika kuonyesha sehemu yoyote kwenye ramani ya nchi.
Westerly wind	A wind that comes from the west.	Upopo unaovuma kutoka magharibi.
Wet bulb Thermometers	Instrument that measures the temperature read by a thermometer covered in water-soaked cloth (wet-bulb thermometer) over which air is passed. At 100% relative humidity, the	Kifaa cha kupima kiwango cha joto na ambacho kimezimikwa na kitambaa kilicholoweshwa maji. Upopo hupitishwa kwenye unyevu huo kabla vipimo kurekodiwa.

	wet-bulb temperature is equal to the air temperature (dry-bulb temperature)	Unyevu unapofikia asilimia mia moja, ujoto huwa umelingana na ule wa hewa kavu (joto la kawaida).
WhatsApp	WhatsApp (also called WhatsApp Messenger) is an internationally available freeware, cross-platform for communication.	Ni mfumo wa kijamii na wa kimataifa unaotumika kwa mawasiliano.
Wind Channeling	The phenomenon of channeling refers to the tendency for the winds within a valley to blow more or less parallel to the valley axis for a variety of wind directions above ridge height.	Tukio ama tendo la upepo ulioko mabondeni kuvuma sambamba na mwelekeo wa upepo ulio juu ya bonde.
Wind Direction	The direction from which the wind is blowing e.g., easterly wind flows from east to west.	Upande ambao upepo unatoka. Km upepo wa mashariki huvuma tokea mashariki kuelekea magharibi.
Wind flow	Wind orientation when air is in motion and caused by differences in air pressure within our atmosphere. Wind flows from the high air pressure area to the low air pressure area.	Hali ya upepo au hewa kuwa inatiririka au kuvuma na hali hii inasababishwa na hali tofautitofauti ya msukumo wa hewa katika anga. Upepo huvuma tokea sehemu yenye msukumo wa juu hadi ule wa msukumo wa chini. Kifaa cha kupima Mwelekeo wa upepo.
Wind vane	A wind vane (also known as a weathervane) is an instrument that tells you the wind direction.	
Wind ward	Facing the wind or situated on the side facing the wind: upwind.	Upande ambao unaangalizana na upepo. Upande wa upepo panda.
Windy	Of weather, a period of time, or a place, marked by or exposed to strong winds.	Hali ya upepo katika sehemu na ambapo una nguvu.
Zonal direction	Is the direction of the air flow that is near or parallel to the latitude.	Upande na mwelekeo wa hewa ambao unavuma sambamba na ukanda au mstari wa mlalo.

Back cover page (To be translated)

The Agricultural Climate Resilience Enhancement Initiative (ACREI) is a three-year partnership project between the World Meteorological Organization (WMO), the Food and Agriculture Organization of the United Nations (FAO) and the IGAD Climate Prediction and Applications Center (ICPAC) funded by the Adaptation Fund under its Pilot Programme for Regional Projects. The program targets Ethiopia, Kenya and Uganda and supports community adaption practice, climate proofing of extension systems and climate informed decision making.

The goal of the ACREI project is to: “Develop and implement adaptation strategies and measures that will strengthen the resilience of vulnerable smallholder farmers, agro-pastoralists and pastoralists in the Horn of Africa to climate variability and change” in line with the IGAD Drought Disaster Resilience Sustainability Initiative (IDDRSI) programme, the National Adaptation Plans of Action (NAPAs) and Development Strategies/Visions of participating countries. The overall objective of the project is: “Improved adaptive capacity and resilience to current climate variability and change among targeted farmers, agro-pastoralists and pastoralist communities.”

The ACREI project is the first approved regional project, funded under the Adaptation Funds Pilot Programme for Regional Projects and is an innovative initiative linking regional and national level climate services capacity to local level adaptation and resilience for smallholder farming communities. In Kenya, the identified project location is Taita Taveta County.

Project Benefits:

- 1. Economic:** Improved *integration of climate-resilience strategies* into country development plans; more efficient use of inputs due to improved weather information; *additional income for farmers* from sale of surplus production; facilitated access to markets and financial services for farmers.
- 2. Social:** Improved food & nutrition security; social cohesion within communities through use of community based approaches; fair access to project activities & services such as farmer field schools.
- 3. Environmental:** Inexpensive and efficient climate change adaptation; reversed land degradation and desertification as well as *improved soil and water conservation* as a result of climate-smart agriculture.

Kenya Meteorological Department (KMD), the Implementing Partner in this project, collaborated/contributed to “Disseminate timely information on climate impacts and weather forecasts through selected community radio, social media and print channels”.
