KENYA METEOROLOGICAL DEPARTMENT

County Director of Meteorological Services (CDMS)—Makueni County

Weekly weather forecast for Makueni County

Validity: 7th October 2025 – 13th October 2025

NB: The icon table, attached at the end of the forecast, contains the key and legend for the icons used.

PART I: WEEKLY FORECAST

Note:

Dry day <1mm.	Light rains (1-5 mm).	Moderate rains (5-20 mm).	Heavy rains > 20 mm.
-------------------------	------------------------------	----------------------------------	--------------------------------

Weekly weather Highlights

The **weekly cumulative rainfall forecast** for Makueni County indicates **light to moderate rainfall** across the region, with uneven spatial distribution.

- **Moderate rainfall (5.5–8.5 mm)** is expected over **parts of Kaiti and localized areas of Kibwezi East**. Also likely in sections of **Kilome and southern Kibwezi West**.
- **Light rainfall (1.5–5.5 mm)** will cover most parts of **Mbooni, central Makueni, and northern Kibwezi West**.
- **Minimal rainfall (<1.5 mm)** is forecast for isolated parts of the **central and eastern zones**, indicating generally dry conditions there.

General Outlook:

- Rainfall activity will be **spatially variable**, with **localized wet conditions** mainly in the highland and southern lowland areas.
- The central parts of the county will remain relatively **dry or experience light drizzles**.

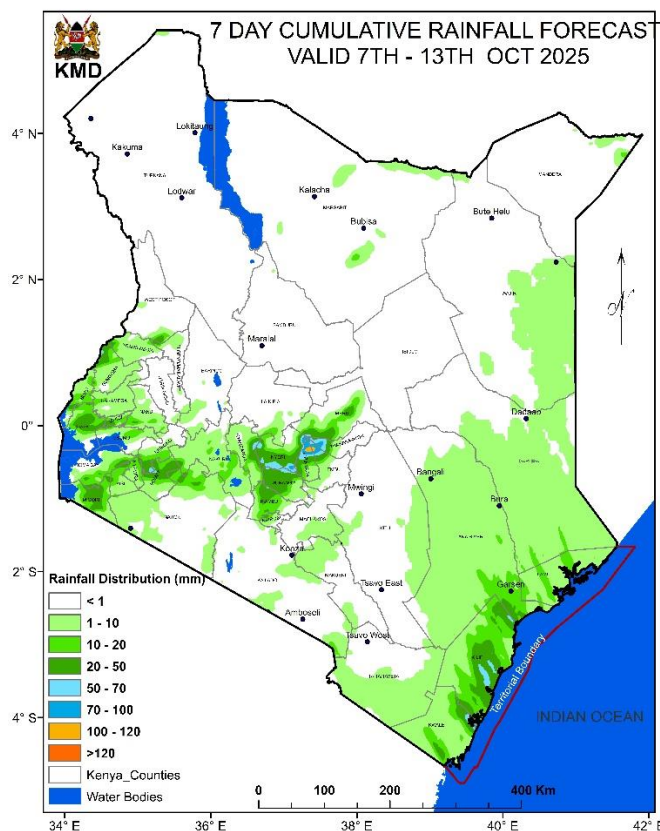

Overall Temperature Summary

- Makueni County will experience **hot days and cool to mild nights** during the forecast period.
- The **southern and eastern lowlands (Kibwezi areas)** will remain significantly hotter than the **highland sub counties (Mbooni and Kaiti)**.
- The combination of **high daytime temperatures and light rainfall** suggests **increased evaporation and rapid drying of topsoil**, requiring **water conservation and heat mitigation measures** across sectors.

Thursday 9 Oct.					23° / 14°	4.2 mm	6 m/s
Friday 10 Oct.					22° / 14°	2.2 mm	5 m/s
Saturday 11 Oct.					25° / 13°	0.1 mm	4 m/s
Sunday 12 Oct.					24° / 14°		4 m/s
Monday 13 Oct.					24° / 13°		4 m/s

PART II: FURTHER ADVISORIES.

i. Weekly Key Advisories – **Rainfall.**

- a. Localized light to moderate rainfall in Kaiti, Kilome, and parts of Kibwezi East will support early land preparation and planting of drought-tolerant crops, while farmers in drier areas should delay planting and conserve available water and fodder.
- b. The expected rainfall will offer slight recharge to surface water sources; communities are advised to harvest rainwater, use available water sparingly, and protect catchment areas from degradation.
- c. Warm and humid conditions may enhance the spread of vector and waterborne diseases; public health vigilance, proper sanitation, and use of safe water are encouraged.
- d. Localized heavy rainfall may cause minor flooding in parts of Kibwezi East and Kaiti; continuous monitoring and community preparedness are recommended.
- e. Rainfall may result in slippery roads and minor transport disruptions in the highland and southern zones; motorists should exercise caution and relevant agencies should maintain drainage systems.

ii. Weekly Key Advisories – **Temperature**

- a. High daytime temperatures and cool nights will accelerate soil moisture loss; farmers are advised to conserve soil moisture and use drought-tolerant crops to minimize heat stress effects.
- b. Elevated temperatures will increase water evaporation; communities should harvest, store, and use water efficiently while protecting natural catchment areas.
- c. Hot days and cool nights may cause heat stress and respiratory discomfort; residents are encouraged to stay hydrated, wear light
- d. High temperatures raise the likelihood of bush and grass fires; communities should remain vigilant and avoid open burning to minimize fire risks.
- e. Prolonged heat may weaken road surfaces; regular maintenance and inspection are advised to preserve infrastructure integrity.

iii. Community members are advised to inculcate the culture of being “weather-ready”, “climate-smart”, and “water-wise”. This is to navigate the unfamiliar and chaotic environment of a varying and changing climate. This will help them adapt to a changing climate while mitigating the adverse effects of climate change.

iv. Farmers are advised to consult the nearest Ward Agricultural Officer (WAO) and the Ward Livestock Production Officer (WLPO) to obtain any further agro-weather, agronomy, and livestock production advisories they may require from time to time as the rainy season ceases and we enter the dry season with occasional Dry days.

Weather symbols Key:

Description	Symbol day	Symbol night	Description	Symbol day	Description	Symbol day	Symbol night
Clear sky			Light rain		Light rain and thunder		
Fair			Rain		Rain and thunder		
Partly cloudy			Heavy Rain		Heavy rain and thunder		
Intermittent light rain			Fog		Intermittent light rain and thunder		
intermittent Rain			Cloudy		Intermittent rain and thunder		
Intermittent heavy rain					Intermittent heavy rain and thunder		

“Intermittent - starting and stopping at irregular intervals”

NB: This forecast should be used with the 24-hour, 5-day, 7-day, and monthly outlooks, special forecasts, alerts, and regular updates/advisories issued by this department.
