Advisory

- Communities are encouraged to continue harvesting and storing rainwater through water pans, tanks, and other conservation methods to sustain domestic and agricultural use during dry periods.
- Households and institutions are further advised to engage in environmental conservation by planting trees to reduce soil erosion, enhance water retention, and support long-term climate resilience.
- Farmers are urged to liaise closely with the Department of Agriculture for guidance on suitable and reliable crop varieties that match the rainfall patterns in their areas. Timely land preparation and use of certified seeds are key to
- Community members are encouraged to keep following official weather updates for any changes.

This forecast should be used in conjunction with the daily (24-hour) and five-day forecasts issued by Kenya meteorological Department.
