KISII COUNTY: WEEKLY WEATHER OUTLOOK & SAFETY ADVISORY

1. Weather Forecast

Rainfall Pattern: Light to moderate rainfall is anticipated on most mornings. However, Tuesday morning is likely to remain mostly cloudy. Showers accompanied by thunderstorms are expected over most areas during the afternoon and evening throughout the week.

2. Temperature Outlook.

Daytime Temperatures: Maximum temperatures will range between 18°C and 26°C.

Night-time Temperatures: Minimum temperatures are expected to range from 11°C to 17°C.

3. Key Sector Advisories

Agriculture: Farmers are advised to consult the Departments of Agriculture, Livestock, Fisheries, and Co-operative Development for guidance on appropriate seasonal activities and farm management practices.

Landslide Risk: Residents living in landslide- and mudslide-prone areas should remain vigilant. Watch for warning signs such as cracked soil and unstable ground, and relocate to safer areas if necessary.

Quarry Safety: Workers and residents are strongly advised not to seek shelter in quarry caves during the rainy season. Water-saturated soils significantly increase the risk of fatal cave-ins.

Environmental Management: The County Government is urged to clear and maintain drainage systems promptly to reduce the risk of flash flooding in urban areas.

Road Safety: Poorly surfaced roads are likely to become slippery. Motorists and pedestrians should exercise extreme caution to minimize the risk of accidents.

Public Health: Health facilities are advised to stock adequate supplies of essential medicines to manage potential increases in malaria, typhoid, and respiratory infections associated with the rainy season.

Lightning Safety: Residents should avoid sheltering under trees during storms to reduce the risk of injury from lightning strikes and falling branches.

Thank you.
