Possible Hazards	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms

Key to rainfall/Showers distribution:

FEW- : Rain is likely to fall in few places (0% to less than 33%), SEVERAL- : Rainfall is likely to fall in several places (33% to less than 66%), MOST- : Rainfall is likely to fall in most places (More than 66%).

Summary

- The above figure shows the weekly cumulative volume of rainfall amounts each ward and/or sub-county in Nakuru County is forecasted to receive from Tuesday 3rd to Monday 9th March 2026.
- Detailed forecast in the above climatic zone tables indicates that all sub counties are projected to receive cumulative weekly rainfall of more than 20mm with parts of Kuresoi, Njoro, Rongai, Subukia, Gilgil and Naivasha being projected to receive heavy cumulative weekly rainfall of more than 120mm (refer to the map legend for details).
- Most of the wards are projected to receive morning rains and afternoon and/or night showers over several places during the forecast period. Areas over large water bodies like lakes Nakuru and Naivasha (and their environs which includes the City and Naivasha town) may occasionally experience afternoon showers due to local climatological effects.
- Kindly refer to the above map and tables for details of projected weather outlook as well as weekly cumulative amounts of rainfall during the forecast period.

Commentary of county weather forecaster:

- Cloudy conditions with rains over few to several places in the morning hours.
- Showers over few to several places in the afternoon/evening.
- Partly cloudy night conditions with showers expected during the forecast period.

Advice to farmers from the Ministry & Department of Agriculture:

Highly consider to always consult your local agricultural extension officer for advice on how to plan farming activities in light of this forecast.
