Possible Hazards	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms	Thunder storms

Key to rainfall/Showers distribution:

FEW- : Rain is likely to fall in few places (0% to less than 33%), SEVERAL- : Rainfall is likely to fall in several places (33% to less than 66%), MOST- : Rainfall is likely to fall in most places (More than 66%).

Summary

- Figure1 above shows the weekly cummulative volume of rainfall amounts each ward and/or sub-county in Nakuru County is forecasted to receive from Tuesday 10th to Monday 16th March 2026.
- Detailed forecast in the climatic zone tables 1-3 above indicates that south eastern parts Naivasha sub county are projected to receive the highest cumulative weekly rainfall of between 20mm and 70mm with parts of Kuresoi, Molo, Njoro, and Naivasha being projected to receive cumulative weekly rainfall of between 10mm and 20mm (refer to the map legend for details on forecasted amounts). The rest of the county is projected to receive below 10mm of rainfall the whole week.
- Most of the wards are projected to receive morning rains and afternoon and/or night showers over few places during the forecast period. Areas over large water bodies like lakes Nakuru and Naivasha (and their environs which includes the City and Naivasha town) may occasionally experience afternoon showers due to local climatological effects.

Commentary of county weather forecaster:

- Partly cloudy conditions with rains over few places in the morning hours.
- Showers over few to several places in the afternoon/evening.
- Partly cloudy night conditions with showers expected during the forecast period.

Advice to farmers from the Ministry & Department of Agriculture:

Highly consider to always consult your local agricultural extension officer for advice on how to plan your farming activities in light of this forecast.
