Rainfall Review for 7th to 13th April 2026

- Wet conditions was reported in most parts of Isiolo County.
- The Temperatures decreased in most parts of the County during the forecast period.
- Comparing the periods 7th to 13th April 2026 and 31st March 6th April 2026, it was noted that most parts of wabera, Burat, Bula Pesa, Kinna Gafarsa, Sericho and Bisan Biliqoand oldonyiro wards recorded moderate to heavy amount of rainfall during the week under review. Bisan Biliqo got the highest 41.1 on 1/4/2026 followed by Kinna 26.0 mm - 31/3/2026, Sericho 20.1 – 31/3 /2026 and Garafarsa 20.0 mm – 31/3/2026.
- The strength of wind was noted to be moderate as compared to the previous forecasted period.

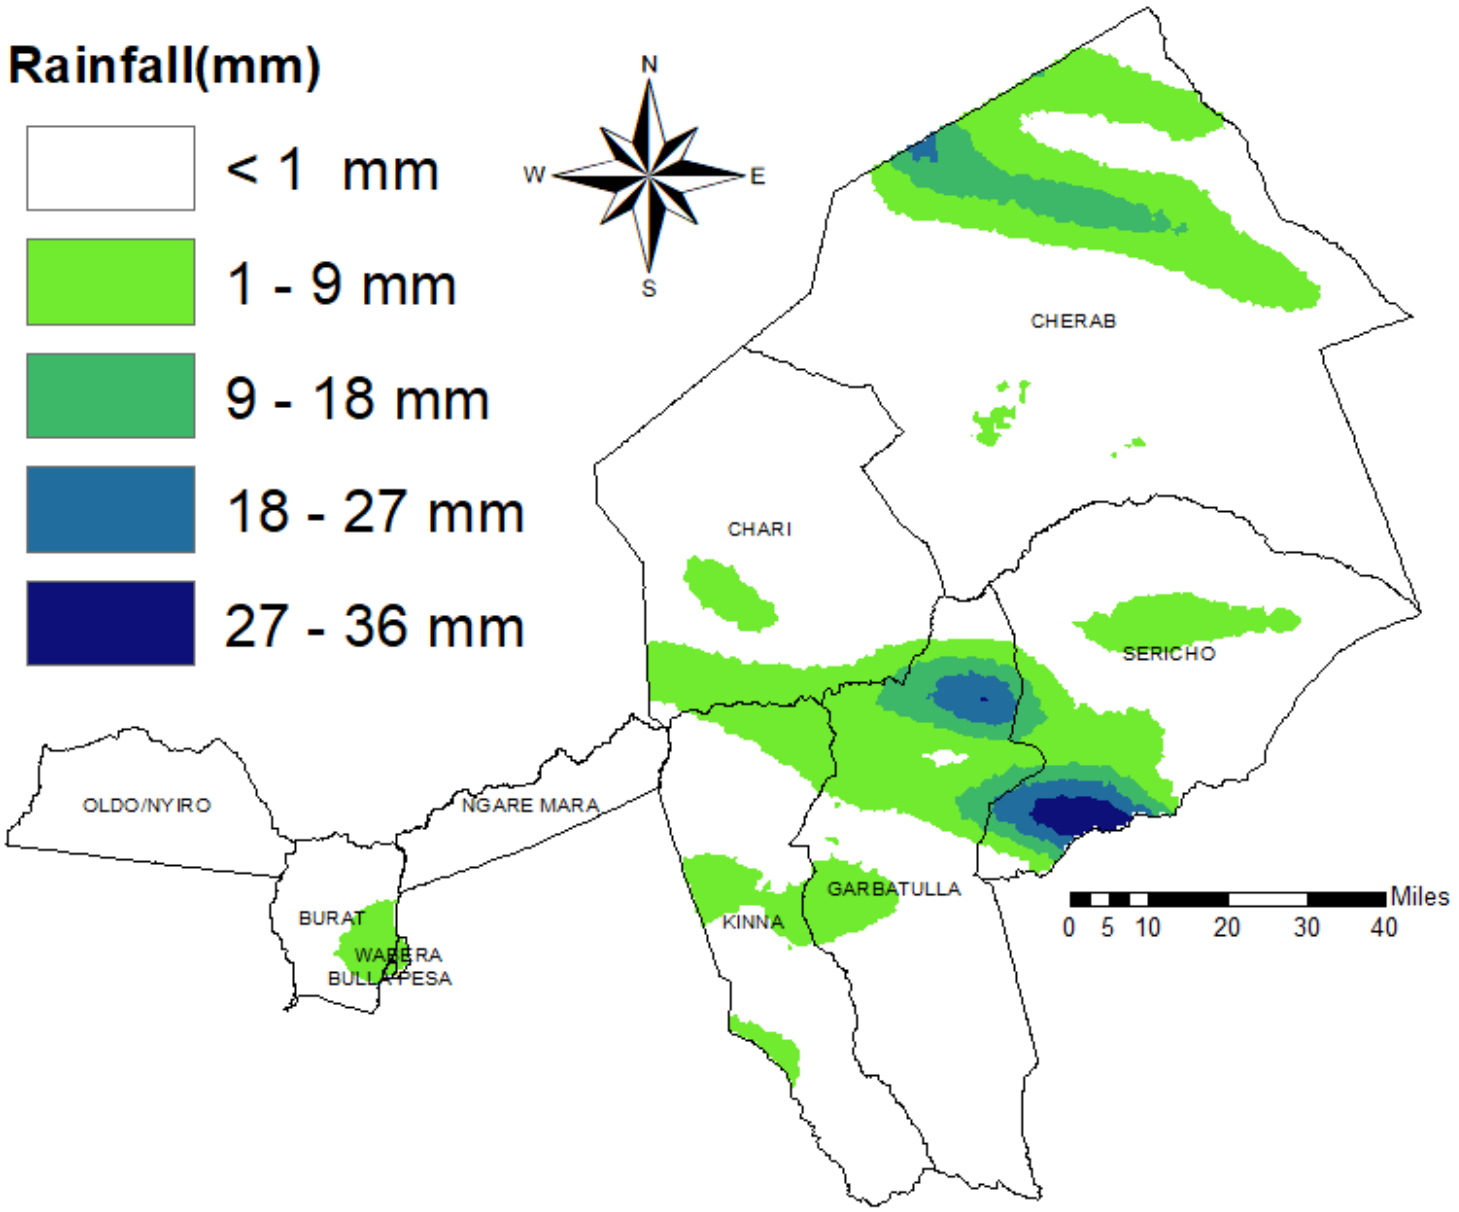

National weather forecast for 14th to 20th April 2026

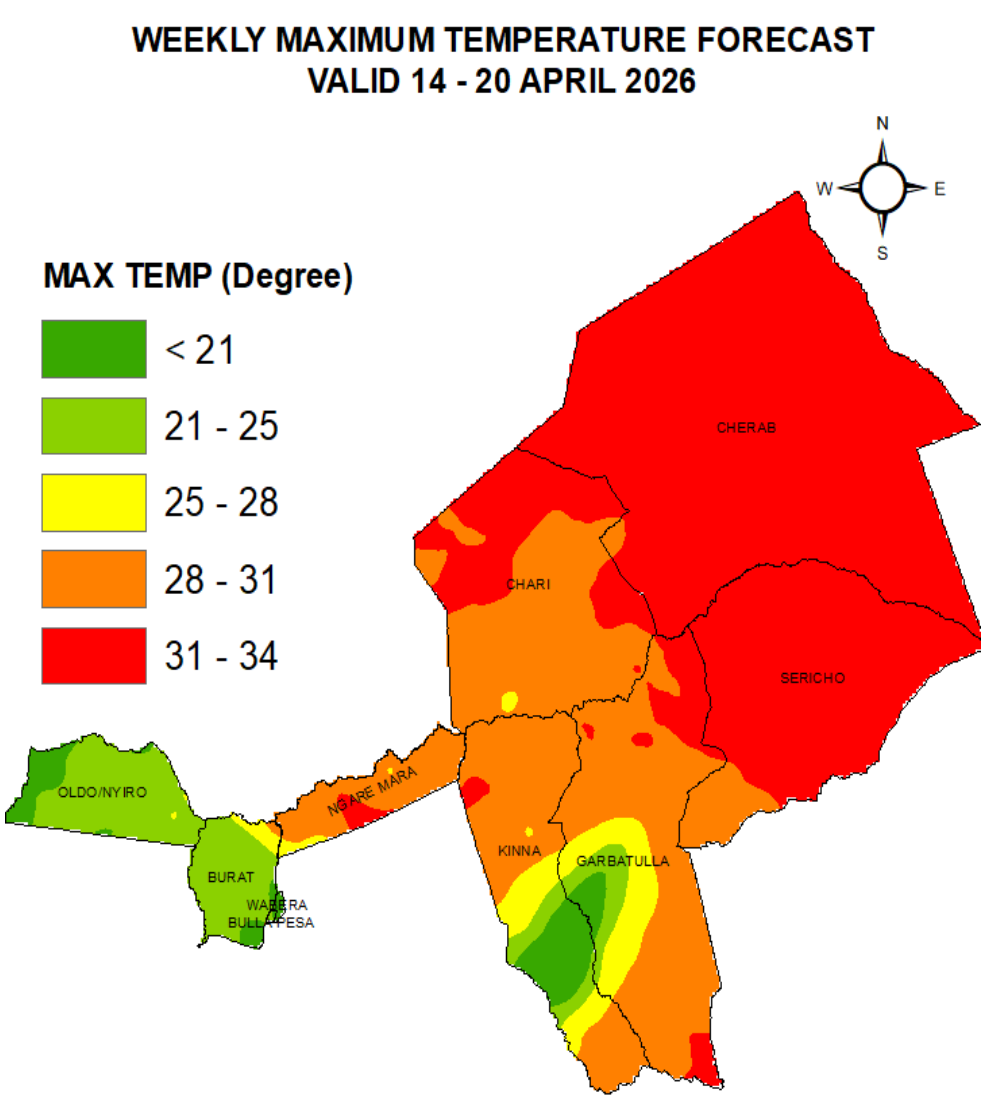

7 Day Cumulative Rainfall Forecast valid 14th to 20th April 2026

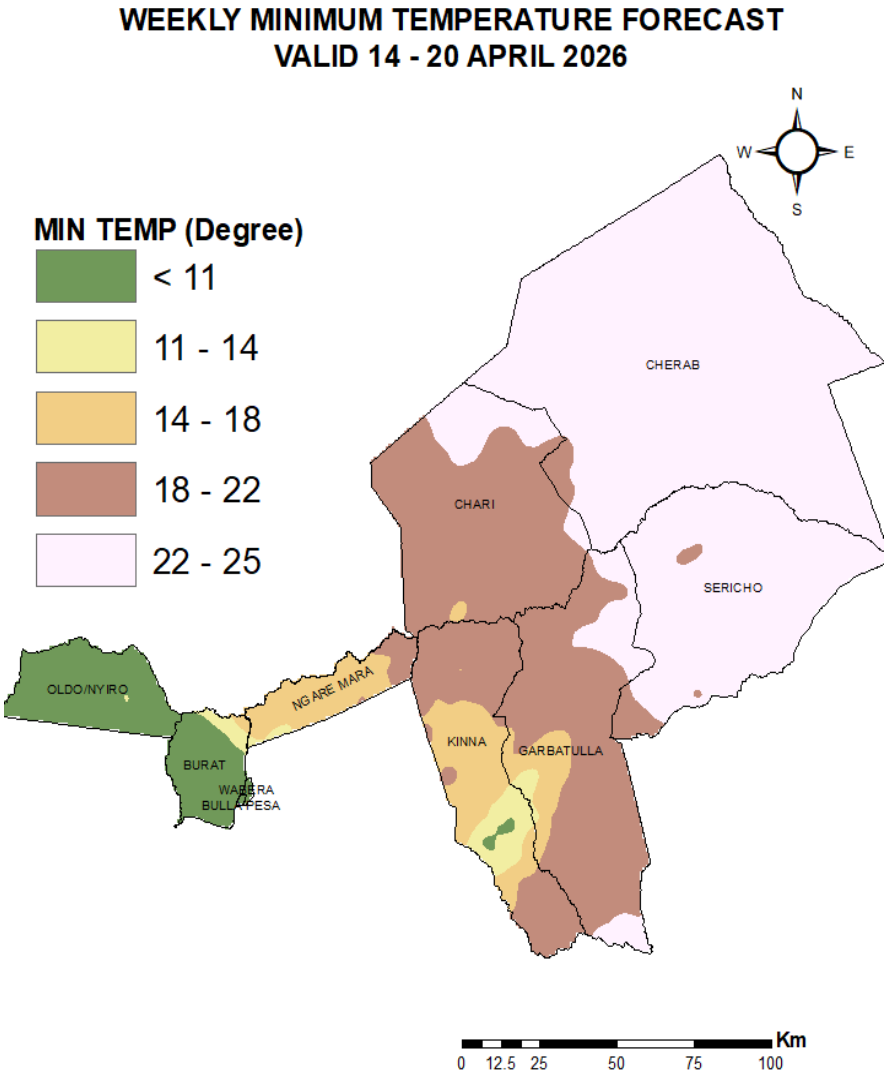

- Rainfall distribution across Isiolo County is expected to be uneven, with most areas receiving light to moderate amounts and a few localized zones experiencing heavier rainfall.
- Moderate to Heavy Rainfall (18 – 36 mm) is expected in some parts of Garbatulla and southeastern Sericho which may be intense but short-duration rainfall events.
- Light to Moderate Rainfall (9 – 18 mm) is expected in Central Isiolo (around Isiolo town), Ngaremara, and parts of Kinna.
- Light Rainfall (1 – 9 mm) are expected in Wabera, Bulla Pesa, Burat, Chari, Cherab, and parts of Sericho which may be sporadic and low in intensity.
- Minimal or no Rainfall (<1 mm) is likely in Oldonyiro and some isolated northern areas. Conditions is expected to remain mostly dry.
- Light to moderate southerly to south-easterly winds, with speeds of less than 25 knots (12.9 m/s), are expected to affect several areas of the County during the forecast period.

WEEKLY ACCUMULATED RAINFALL AMOUNT VALID 14 - 20 APRIL 2026

Isiolo Seven Day temperature forecast valid from 14th to 20th April 2026

Isiolo Seven Day température forecast valid from 14th to 20th April 2026

- Isiolo County is expected to experience generally high daytime temperatures throughout the week, with most areas recording 28°C to 34°C.

- The hottest conditions will be observed in Sericho, Cherab, and parts of Chari, where temperatures may exceed 31°C, while slightly cooler conditions (25°C to 28°C) are expected in Kinna and parts of Garbatulla.

- The coolest daytime temperatures (below 25°C) will be limited to localized areas in southern Garbatulla and Oldonyiro, likely due to increased cloud cover and rainfall.

- Nighttime temperatures will vary across the county, with warmer nights (22°C – 25°C) expected in Sericho and Cherab, while central and southern areas such as Garbatulla, Kinna, and Chari will experience mild nights (18°C – 22°C). Cooler nights (11°C – 18°C) are likely in Wabera, Bulla Pesa, Burat, and Oldonyiro, making these areas relatively more comfortable..

Advisory

- Downstream sections of the Ewaso Nyiro River are expected to experience increased water levels due to anticipated rainfall in the upstream catchment areas. This may lead to rising river flows, particularly as runoff accumulates over time.

- As the season progresses, occasional heavy storms are likely, which could further elevate river levels and increase the risk of localized flooding.

- Communities living downstream are therefore advised to remain vigilant, avoid flood-prone areas, and closely monitor updates from relevant Meteorological Department.

- However, despite the expected rains, there is still a possibility of short dry spells in some parts of the county (Burat, Chari, Cherab, and parts of Sericho), which may temporarily reduce rainfall activity and water availability.

- Location-specific forecasts for Isiolo County are available from the County Director of Meteorological Services at the Isiolo Meteorological Office.

THE END

THANK YOU ALL.
