REF: KMD/ISL/WK/FCST/16/6/2026

ISIOLO COUNTY WEEKLY WEATHER FORECAST
VALID: 16th to 22nd June 2026.

Date of issue: Monday 15th June 2026

Isiolo County Weather Outlook (16th – 22nd June 2026)

Most parts of Isiolo County are expected to remain generally dry during the forecast period of 16th – 22nd June 2026. Light rainfall is likely to occur in a few isolated areas around Oldonyiro and sections bordering Laikipia County, while the larger part of the county is expected to receive little or no rainfall. Dry and windy conditions are expected to persist across much of the county.

1. Isiolo Central Sub-County (Isiolo Town, Burat, Oldonyiro)

Isiolo Town, Burat, Wabera, and Bulapesa are expected to experience predominantly sunny, dry, and warm conditions throughout the forecast period. However, localized showers may occur around Oldonyiro and adjacent western areas.

Wind Forecast
Moderate winds of approximately 12–25 knots are expected across most areas, with occasional stronger gusts over open plains.

2. Garbatulla Sub-County (Garbatulla, Kinna, Sericho)

Garbatulla, Kinna, and Sericho are expected to remain predominantly dry, sunny, and warm, with occasional cloud cover.

Pasture and browse conditions are likely to continue declining gradually due to limited rainfall and persistent dry conditions. Livestock watering points may remain under pressure in some locations.

Wind Forecast
Moderate to strong winds ranging between 15–30 knots are expected, particularly across the open eastern plains, with occasional dusty conditions during afternoons.

3. Merti Sub-County (Merti, Bulesa, Kom)

Dry and mostly sunny weather conditions are expected to prevail across Merti, Bulesa, Kom, and surrounding areas throughout the forecast period.

Wind Forecast
Moderate to strong winds of approximately 15–30 knots are expected across much of the sub-county, especially over exposed dry areas.

4. Ngaremara Areas

Ngaremara and surrounding areas are expected to remain generally dry, although isolated brief light showers of less than 2 mm may occur in a few locations.

Wind Forecast
Moderate winds of around 15–25 knots are expected, with occasional stronger gusts.

5. Kinna & Ewaso Nyiro Belt

Most parts of Kinna and the Ewaso Nyiro belt are expected to remain generally dry throughout the forecast period, with rainfall amounts remaining below 2 mm in most locations.

Wind Forecast
Winds ranging between 15–28 knots are expected across the riverine belt and adjacent dry plains.

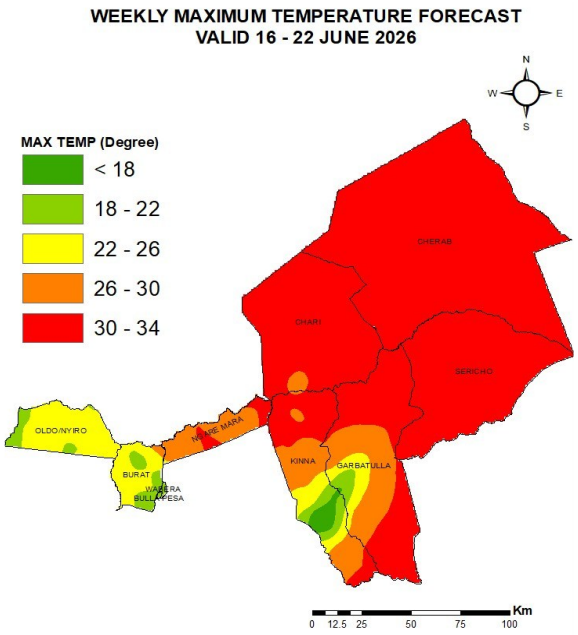

6. Sericho & Cherab Areas

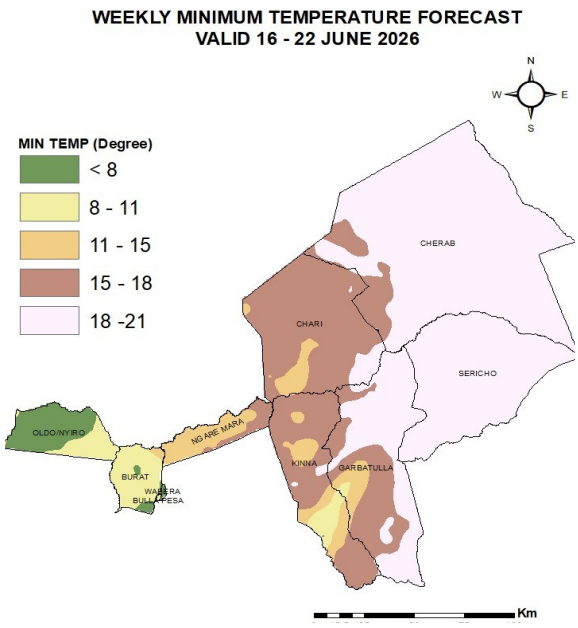

Sericho, Cherab, and the eastern parts of the county are expected to remain hot, sunny, and dry, with no significant rainfall expected during the forecast period.

Wind Forecast
Strong winds of around 20–32 knots are expected, especially during afternoon hours. Occasional blowing dust and temporary reductions in visibility may occur in exposed areas.

Temperature

- The hottest conditions are likely over the lowland eastern and northeastern areas, including Sericho, Cherab, Garbatulla, and parts of Merti, where daytime temperatures may exceed 36°C.
- Relatively cooler temperatures are expected around Oldonyiro and nearby western elevated areas influenced by the Mt. Kenya highlands.
- Most parts of Isiolo Central, Burat, and Kinna are expected to remain moderately hot during the day, with cooler nights in western highland-influenced areas and warmer nights across the eastern lowlands.

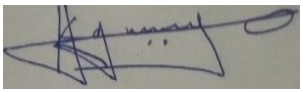

Advisory

- Residents are advised to continue conserving available water resources as dry conditions are expected to persist across most parts of the county.
- Livestock owners are encouraged to monitor grazing conditions and plan water access strategically, particularly in eastern and northeastern areas where pasture conditions may continue declining.
- Communities in Sericho, Cherab, Merti, and Garbatulla should remain alert to strong winds, blowing dust, and occasional reductions in visibility.
- Residents are encouraged to take precautions against heat stress, especially during afternoon hours in lowland areas where temperatures are expected to remain high.
- Motorists travelling along Isiolo–Garbatulla, Isiolo–Merti, and other open-road corridors should exercise caution due to occasional dusty and windy conditions.

Location-specific forecasts for Isiolo County are available from the County Director of Meteorological Services at the Isiolo Meteorological Office.
