ISIOLO COUNTY WEEKLY WEATHER FORECAST
VALID: 14th to 20th July 2026.

Date of issue: Monday 13th July 2026

Isiolo County Weather Outlook (14th to 20th July 2026)
Most parts of Isiolo County are expected to remain generally dry during the forecast period of 14th to 20th July 2026, as the cool and dry season continues to dominate much of northern and eastern Kenya. No significant rainfall is expected across most parts of the county.

Cool mornings and nights are expected in the western highland while warm to hot daytime temperatures will persist across the eastern, central, and northeastern parts of the county.

Moderate to occasionally strong winds are expected throughout the week, with localized dusty conditions likely over exposed and open areas.

1. Isiolo Central Sub-County (Isiolo Town, Burat, Wabera, Bulapesa, Oldonyiro)
Isiolo Town, Burat, Wabera, Bulapesa, and surrounding areas are expected to remain predominantly sunny and dry throughout the forecast period. Oldonyiro and neighboring western areas may experience isolated light showers of less than 3 mm, although rainfall is expected to remain localized and brief.

Wind Forecast
Moderate winds of approximately 12–25 knots are expected across most areas.
Occasional gusty winds may develop during the afternoons, particularly over open plains and along major road corridors.

2. Garbatulla Sub-County (Garbatulla, Kinna, Sericho)
Garbatulla, Kinna, and surrounding settlements are expected to remain largely dry, with sunny conditions and occasional cloud cover. Continued dry weather is likely to maintain pressure on pasture and browse resources, particularly in areas far from permanent water sources.

Wind Forecast
Moderate to strong winds ranging between 15–30 knots are expected.
Dusty conditions may develop during afternoon hours, especially over open rangelands.

3. Merti Sub-County (Merti, Bulesa, Kom)
Dry and mostly sunny weather is expected to prevail across Merti, Bulesa, Kom, and surrounding areas throughout the forecast period. No significant rainfall is anticipated.

Wind Forecast
Moderate to strong winds of approximately 15–30 knots are expected.
Localized dust lifting is likely over exposed dry surfaces.

4. Ngaremara Areas
Ngaremara and neighboring locations are expected to remain generally dry. Afternoon cloud build-up may occur on a few days, but rainfall is unlikely, and any showers that develop are expected to be isolated and light.

Wind Forecast
Moderate winds of around 15–25 knots are expected.
Occasional stronger gusts may occur in open areas.

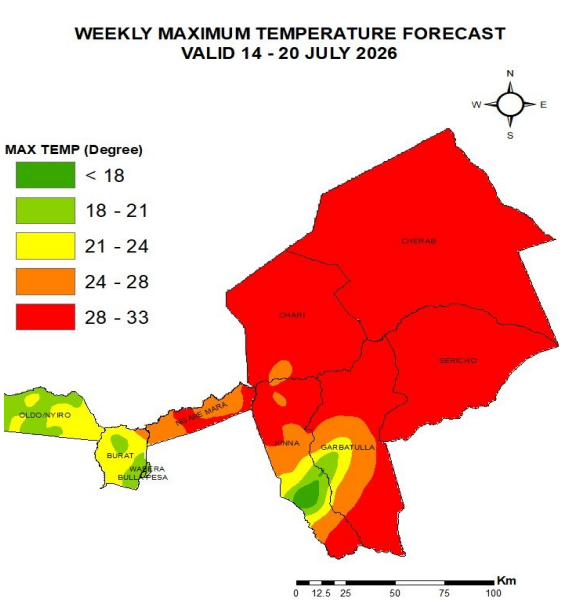

5. Kinna & Ewaso Nyiro Belt
Most parts of Kinna and the Ewaso Nyiro River corridor are expected to remain dry during the forecast period. Riverine areas may experience occasional afternoon cloudiness, but no significant rainfall is expected.

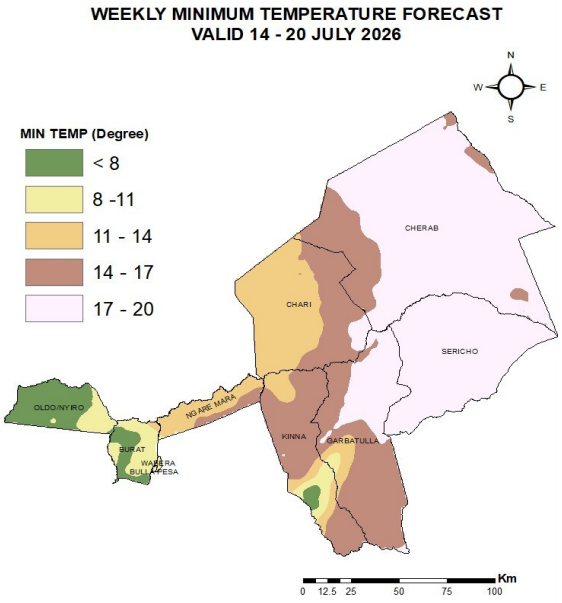

Wind Forecast
Winds ranging between 15–28 knots are expected along the river corridor and adjacent plains.
Localized dust may occur in dry areas away from the river.

6. Sericho & Cherab Areas
Sericho, Cherab, and the eastern parts of the county are expected to remain hot, sunny, and dry throughout the forecast period. No significant rainfall is expected.

Wind Forecast
Strong winds of approximately 20–32 knots are expected, particularly during the afternoons. Blowing dust and temporary reductions in visibility may occur in exposed locations.

Temperature Outlook (14th to 20th July 2026)
Isiolo County is expected to continue experiencing generally warm to hot daytime temperatures, with cooler conditions over the western highland-influenced areas around Oldonyiro.

Western Highland
Oldonyiro and areas bordering Laikipia County
Daytime temperatures: 24°C – 29°C
Night-time temperatures: 14°C – 18°C

Central Areas
Isiolo Town, Burat, Wabera, Bulapesa and Ngaremara
Daytime temperatures: 30°C – 34°C
Night-time temperatures: 18°C – 22°C

Southern and Eastern Areas
Kinna, Garbatulla, Merti, Bulesa and Kom
Daytime temperatures: 32°C – 37°C
Night-time temperatures: 20°C – 24°C

Northeastern Lowlands
Sericho, Cherab and surrounding areas
Daytime temperatures: 35°C – 39°C
Night-time temperatures: 22°C – 25°C

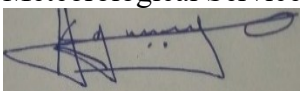

Advisory

- Livestock keepers are advised to continue monitoring water availability and grazing conditions as dry weather persists across most parts of the county.
- Farmers undertaking irrigated agriculture should continue using available water resources efficiently due to the prevailing dry conditions.
- Residents in areas prone to dust are encouraged to take appropriate precautions, particularly during periods of strong winds and reduced visibility.
- Motorists travelling along dry earth roads, especially in Sericho, Merti, Cherab, Garbatulla, and Kinna, should exercise caution as blowing dust may temporarily reduce visibility.
- Residents should secure temporary structures, tents, and light roofing materials against occasional strong wind gusts.
- Communities are encouraged to observe fire safety measures, as dry vegetation combined with windy conditions may increase the risk of bush and grass fires.
- Pastoral communities should continue planning livestock movements carefully and avoid over-concentration around limited water sources to reduce pressure on available pasture and water resources.

Residents in western parts of the county should remain alert for occasional morning fog and cool conditions that may affect visibility along major roads and transport routes.

The public is advised to continue following official county and national weather updates for any changes in the prevailing weather conditions.

Location-specific forecasts for Isiolo County are available from the County Director of Meteorological Services at the Isiolo Meteorological Office.
