STATE DEPARTMENT FOR ENVIRONMENT AND CLIMATE CHANGE

KENYA METEOROLOGICAL DEPARTMENT

NOTE: Dry day <1mm. Light rains (1-5 mm). Moderate rains (5-20 mm). Heavy rains (20-50 mm). Very Heavy rains > 50 mm.

MAKUENI COUNTY WEEKLY WEATHER FORECAST

Forecast Period: September 01, 2026 – September 07, 2026

FORECAST HIGHLIGHTS

The week is expected to remain **predominantly dry**, with **localized light rainfall** possible mainly over the northern and north-western highlands and isolated pockets elsewhere. Daytime temperatures will range from **cool over the highlands** to **hot over the lowlands**, while nights will generally be **cold to cool**.

RAINFALL — PREDOMINANTLY DRY

- Forecast category: ● DRY → LIGHT RAINS (Localized)

Dry conditions (<1 mm) are expected across **most parts of the county**, particularly central, southern and south-eastern areas. **Localized light rains (1–2 mm)** are possible over:

- **Mbooni**
- **Kaiti**
- Northern **Makueni**
- Isolated pockets of **Kibwezi West** and **Kibwezi East**

Action

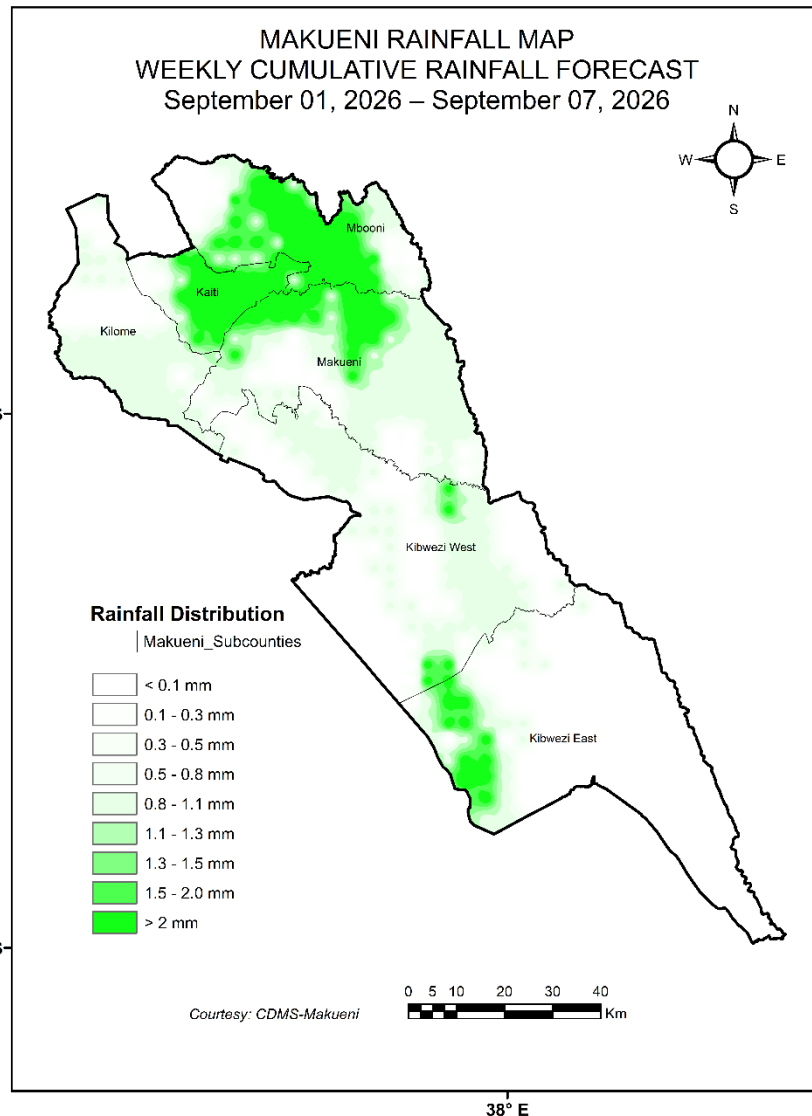

Agriculture: Take advantage of any localized moisture availability for limited field activities, but **do not rely on it for sustained crop-water requirements**.

Water: Maintain water-conservation measures and prioritize available water resources.

Field operations: Plan major farm operations around the predominantly dry conditions; use any rainfall received to support localized planting, establishment or maintenance where appropriate.

MAXIMUM TEMPERATURE

Daytime: COOL → WARM → HOT

Category	Temperature	Expected areas
 Cool	≤25°C	Mainly Mbooni, higher Kaiti and parts of Kilome
 Warm	26–29°C	Much of Makueni and surrounding areas
 Hot	30–33°C	Mainly Kibwezi West and parts of Kibwezi East
 Very Hot	≥34°C	Not expected

Action

-  **Heat management:** Residents in the lower-elevation areas should **limit prolonged exposure to afternoon heat**, maintain hydration and schedule strenuous outdoor activities during cooler periods.
-  **Livestock:** Provide **adequate drinking water and shade**, particularly in the hotter Kibwezi lowlands.

MINIMUM TEMPERATURE

Night-Time: COLD → COOL NIGHTS EXPECTED

Category	Temperature	Expected areas
 Cold	≤12°C	Mainly Mbooni, Kaiti, parts of Kilome and localized pockets elsewhere
 Cool	13–15°C	Much of Makueni, Kibwezi West and Kibwezi East
 Mild	16–18°C	Not indicated
 Warm	≥19°C	Not indicated

Action

-  **Public health:** Communities in colder highland areas should **protect vulnerable groups from cold nights**, particularly children and older persons.
-  **Agriculture:** Farmers should account for **cooler overnight conditions and morning dew** when planning crop-management activities.

SPATIAL WEATHER HIGHLIGHTS

Area	Rainfall	Daytime	Night-time	Priority Action
Mbooni	Dry–Light	Cool	Cold–Cool	Monitor localized rain; protect against cold
Kaiti	Dry–Light	Cool–Warm	Cold–Cool	Utilize localized rainfall; maintain water conservation
Kilome	Dry	Cool–Warm	Cold–Cool	Plan activities around dry conditions
Makueni	Predominantly Dry	Warm	Cold–Cool	Conserve water; manage afternoon heat
Kibwezi West	Predominantly Dry	Warm–Hot	Cool	Heat and water management
Kibwezi East	Predominantly Dry	Warm–Hot	Cold–Cool locally	Hydration, livestock water and heat management

Maximum Temperature Categories

Category	Range (°C)	Meaning
Cool	≤25	Mild daytime heat; low stress
Warm	26–29	Comfortable; suitable for activities
Hot	30–33	Intense heat; moderate stress
Very Hot	≥34	Extreme heat; high stress

Minimum Temperature Categories

Category	Range (°C)	Meaning
Cold	≤12	Chilly; frost/dew possible
Cool	13–15	Mild; minimal stress
Mild	16–18	Moderate; favorable for growth
Warm	≥19	Warm nights; limited cooling

⚠️ KEY ACTION MESSAGES

☁️ PLAN FOR LIMITED MOISTURE

- Rainfall is expected to be **insufficient and spatially localized**.

☀️ MANAGE AFTERNOON HEAT

- The **Kibwezi lowlands** are likely to experience the highest daytime temperatures. Schedule demanding outdoor activities during cooler hours and maintain adequate hydration.

🌙 PREPARE FOR COLD NIGHTS

- Higher-elevation areas, particularly **Mbooni and Kaiti**, should prepare for **cold overnight conditions**.

🌱 SUPPORT AGRICULTURAL DECISIONS

- Use localized rainfall where it occurs, but **base major agricultural decisions on subsequent forecasts and observed rainfall**, rather than isolated showers.

💧 PRIORITIZE WATER SECURITY

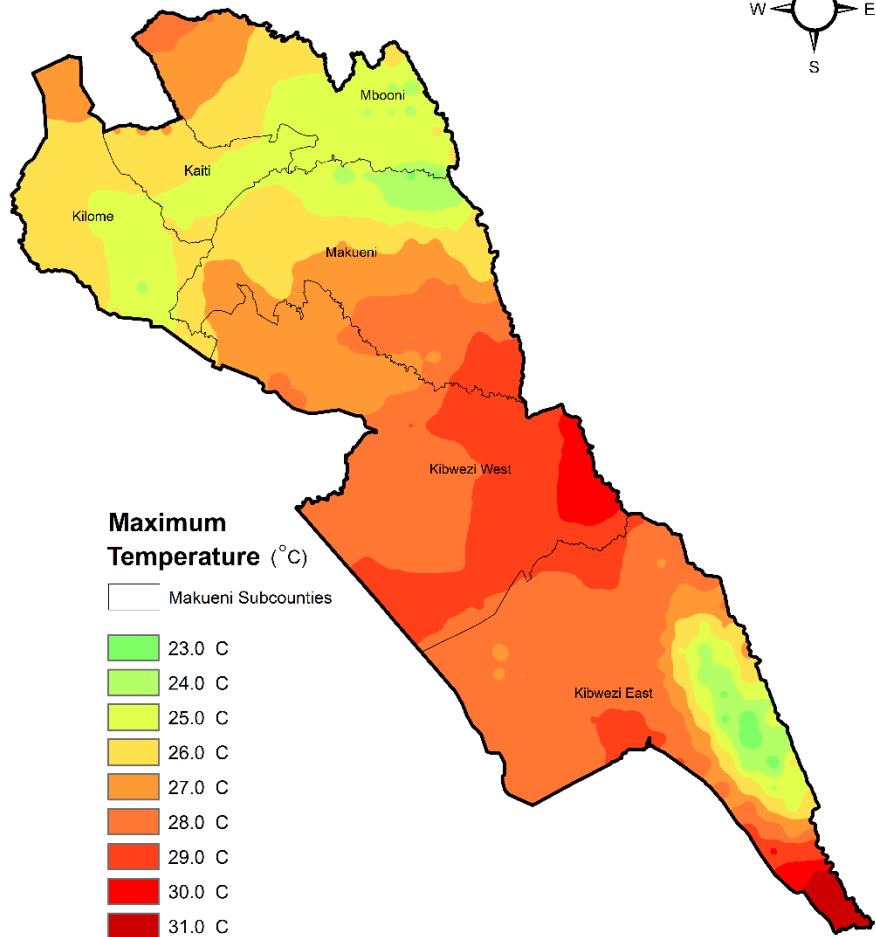

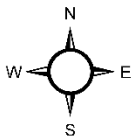

- The predominantly dry forecast reinforces the need for **continued water harvesting, storage and efficient utilization**.

COUNTY WEATHER MESSAGE

☁️ Makueni County is expected to experience predominantly dry weather during 01–07 September 2026, with localized light rainfall mainly over the northern and north-western highlands. Daytime temperatures will range from cool over the highlands to hot over the Kibwezi lowlands, while nights will generally remain cold to cool. Residents, farmers and livestock keepers are advised to conserve water, manage afternoon heat in the lowlands, and prepare for cold nights in the highlands.

Forecast confidence: The rainfall pattern is spatially variable; **subsequent daily and weekly updates should be monitored for changes in rainfall occurrence and distribution.**
