MAKUENI COUNTY WEEKLY WEATHER FORECAST

Forecast Period: September 22, 2026 – September 28, 2026

FORECAST WEATHER HIGHLIGHTS

Overview

Weather conditions across **Makueni County** during the week of **22–28 September 2026** are expected to be characterized by **generally dry to light rainfall**, with rainfall becoming more concentrated over the **western and northwestern highlands**. Daytime temperatures are expected to range from **cool in the elevated areas to hot in the lower southeastern parts**, while nighttime temperatures will generally remain **cold to cool**.

The forecast indicates a marked **topographic gradient**, with the elevated areas of **Mbooni, Kaiti and Kilome** remaining cooler and receiving relatively more rainfall, while the lower-lying **Kibwezi East and Kibwezi West** areas are expected to experience warmer daytime conditions and generally dry conditions.

RAINFALL FORECAST HIGHLIGHT

- **Expected category**: **Dry** to **Light**, with **localized areas exceeding 5 mm**

Rainfall Category	Expected Distribution
Dry (<1 mm)	Extensive areas, particularly parts of Kibwezi East and Kibwezi West
Light (1–5 mm)	Widespread across much of the county
>5 mm	Localized pockets, especially over western/northwestern highlands
Heavy (20–50 mm)	Not indicated
Very Heavy (>50 mm)	Not indicated

County Director of Meteorological Services (CDMS)—Makueni County

Email: swambua@meteo.go.ke info@meteo.go.ke Website: http://www.meteo.go.ke

Spatial distribution

- Highest rainfall concentrations: **Mbooni, Kaiti** and **Kilome** and adjoining highland areas.
- **Central Makueni:** predominantly dry to light rainfall, with isolated rainfall pockets.
- **Kibwezi West:** mainly dry to light rainfall.
- **Kibwezi East:** mainly dry to light rainfall, with isolated wetter pockets.

Action: Farmers and water managers should take advantage of localized rainfall for **water harvesting and soil-moisture conservation**, while areas expecting **predominantly dry conditions** should continue with **prudent water-use** and **livestock-water management**.

🌡️ MAXIMUM TEMPERATURE HIGHLIGHT

Expected category: Cool to Hot

Category	*Range*	Expected Areas
Cool	*≤25°C*	Mbooni, Kaiti, Kilome and other elevated areas
Warm	*26–29°C*	Central Makueni and much of the county
Hot	*30–33°C*	Mainly lower southeastern/eastern areas, particularly Kibwezi
Very Hot	*≥34°C*	Not indicated

Spatial pattern

A clear elevation-related temperature gradient is expected:

- Highlands → Cooler
- Central areas → Warm
- Lower southeastern areas → Hotter

The warmest conditions are expected mainly toward **Kibwezi East, Kibwezi West and the southeastern lowlands**.

Action: Communities in the warmer lower areas should maintain adequate **hydration, ventilation and livestock watering**, particularly during the warmest part of the day. Outdoor activities should be planned preferentially during cooler morning and late-afternoon periods.

🌙 MINIMUM TEMPERATURE

Expected category: Cold to Cool

Category	*Range*	Expected Areas
Cold	*≤12°C*	Mainly Mbooni, Kaiti, Kilome and other elevated areas
Cool	*13–15°C*	Central and lower parts of the county
Mild	*16–18°C*	Not indicated
Warm	*≥19°C*	Not indicated

County Director of Meteorological Services (CDMS)—Makueni County

Email: swambua@meteo.go.ke info@meteo.go.ke Website: http://www.meteo.go.ke

Minimum temperatures are expected to range approximately from **8°C in the higher areas to 15°C in the lower areas**.

Action: Households, schools and livestock keepers in the elevated areas should prepare for **cool mornings and nights**, including appropriate clothing, bedding and protection of vulnerable livestock.

📍 SUBCOUNTY FORECAST HIGHLIGHTS

Subcounty	Rainfall	Maximum Temperature	Minimum Temperature	Key Action
Mbooni	Light to >5 mm locally	Cool–Warm	Cold–Cool	Harvest localized rainfall; protect against cool nights
Kaiti	Light to >5 mm locally	Cool–Warm	Cold–Cool	Conserve soil moisture and protect livestock from cold
Kilome	Light to >5 mm	Cool–Warm	Cold–Cool	Utilize rainfall pockets; prepare for cool nights
Makueni	Mainly Dry–Light	Warm	Cool	Manage water resources and monitor localized rainfall
Kibwezi West	Mainly Dry–Light	Warm–Hot	Cool	Prioritize water management and heat mitigation
Kibwezi East	Mainly Dry–Light	Warm–Hot	Cool	Maintain livestock/human hydration and water conservation

Maximum Temperature Categories

Category	Range (°C)	Meaning
Cool	≤25	Mild daytime heat; low stress
Warm	26–29	Comfortable; suitable for activities
Hot	30–33	Intense heat; moderate stress
Very Hot	≥34	Extreme heat; high stress

Minimum Temperature Categories

Category	Range (°C)	Meaning
Cold	≤12	Chilly; frost/dew possible
Cool	13–15	Mild; minimal stress
Mild	16–18	Moderate; favorable for growth
Warm	≥19	Warm nights; limited cooling

KEY SECTOR ACTIONS

🌾 Agriculture

- **Conserve available soil moisture** through mulching and minimum soil disturbance.
- Farmers in areas receiving localized rainfall should **harvest and retain rainwater**.
- Avoid relying on isolated rainfall events for major planting decisions without considering subsequent forecasts.
- Monitor crop moisture conditions, particularly in predominantly dry areas.

🐄 Livestock

- Maintain adequate **water availability**, especially in Kibwezi East and West.
- Provide shelter for livestock during **cold nights and early mornings** in the highlands.
- Monitor livestock condition where dry conditions persist.

💧 Water

County Director of Meteorological Services (CDMS)—Makueni County

Email: swambua@meteo.go.ke info@meteo.go.ke Website: http://www.meteo.go.ke

- **Harvest localized rainfall** wherever feasible.
- Maintain household and institutional water-storage facilities.
- Monitor water sources in predominantly dry areas and promote efficient water use.

🏥 Health

- Prepare for **cool morning and nighttime conditions** in elevated areas.
- Encourage adequate hydration in the warmer southeastern areas.
- Monitor weather-sensitive conditions where prolonged cool or warm conditions affect vulnerable populations.

🚧 Infrastructure & Environment

- Maintain drainage systems even though **heavy rainfall is not indicated**, because localized rainfall can still generate short-duration runoff.
- Monitor localized rainfall over steep/highland terrain for possible soil erosion.
- Keep drainage channels and culverts clear ahead of any localized rainfall events.

🔑 KEY TAKEAWAYS

🌧️ Rainfall

Dry to light rainfall will dominate, with localized rainfall exceeding 5 mm mainly over the western and northwestern highlands. **No heavy or very heavy rainfall is indicated by the supplied map.**

🌡️ Daytime temperatures

Temperatures will generally increase from **cooler highlands to warmer/hotter southeastern lowlands**, with **no widespread very-hot conditions indicated**.

🌙 Nighttime temperatures

Nights will generally be **cold to cool**, with the lowest temperatures expected over the elevated areas of **Mbooni, Kaiti and Kilome**.

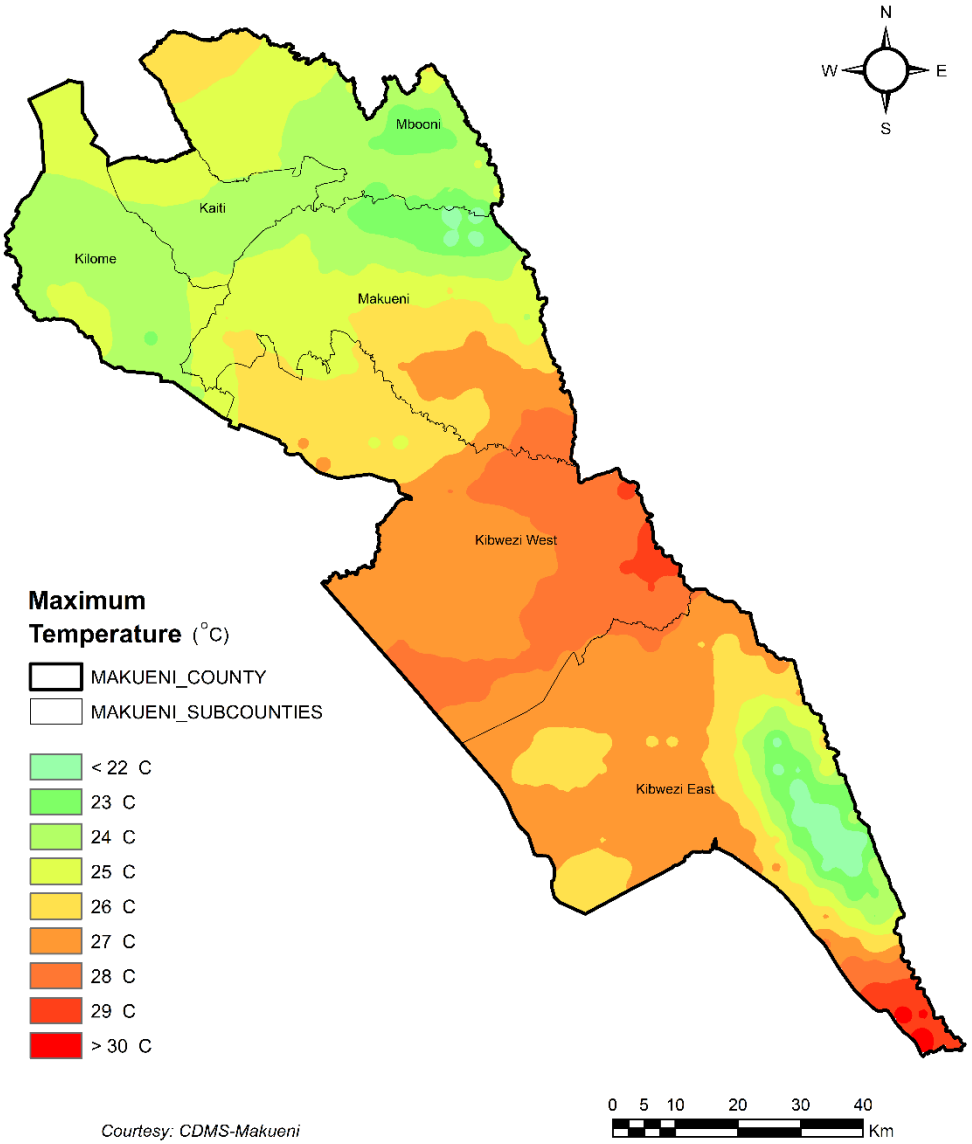

🎯 Priority actions

- Water conservation
- Rainwater harvesting
- Soil-moisture conservation
- Livestock protection
- Heat/cold management
- Continued monitoring of localized rainfall.
