KENYA METEOROLOGICAL DEPARTMENT

BUSIA COUNTY WEEKLY WEATHER FORECAST

Period of forecast: Tuesday 22nd September 2026 to Monday 28th September 2026

Date of issue: Monday 21st September 2026

Summary

Dry mornings are expected most days, with some rain possible on Sunday and Monday over a few places. Afternoon and occasional night rains are likely, especially in central areas. Bunyala, Samia, and Teso North are likely to experience lighter, less frequent showers. Lightning, thunder, strong winds, and isolated hailstones are possible. Daytime temperatures will be slightly warmer than last week, with highs of 31°C to 33°C. Lows will remain around 18°C to 19°C.

Hazards	**Thunderstorm**	**Thunderstorm**	**Thunderstorm**	**Thunderstorm**	**Thunderstorm**	**Thunderstorm**	**Thunderstorm**

Commentary of County Weather Forecaster:

- **Harvest rain water and store it safely for future use.** Fill enough containers to sustain your household and livestock through future dry spells.
- **Move all livestock into their shade when you see dark clouds form.** Do not leave animals grazing in the open once heavy dark clouds develop. Lightning, strong wind, hailstones and cold rain pose serious health risks to the animals.
- **Check your soil moisture daily by digging 5 cm into the ground — if it is dry, irrigate your crops that evening** rather than waiting for rain that may not reach your farm.
- **Walk through your fields every morning and inspect the underside of leaves and plant stems for spots, wilting, or insects** . Warm humid nights will speed up pest and disease outbreaks. Report any unusual symptoms to your agriculture extension officer immediately.

Note: There may be differences in amount of rainfall forecasted and amount of rainfall received.
