#### 1. PART II: Further Advisories.

(i) Community members advised to inculcate the culture of being “weather – ready”, “climate smart” and “water – wise” as we navigate the unfamiliar and chaotic environment of a changing climate. This will help them adapt to a changing climate while at the same time mitigating the adverse effects of climate change.

(ii) Farmers advised to consult the nearest Ward Agricultural Officer (WAO) and the Ward Livestock Production Officer (WLPO) to get any further agro-weather, agronomy and livestock production advisories they may require from time to time as the Short Rains 2024 season ceases and we enter into the hot dry season with occasional light rains.

(iii) Farmers advised to take advantage of the seasonal rains to harvest as much water as possible either roof catchment or surface runoff.

(iv) Members of the community advised to take advantage of the seasonal rains and grow trees at individual level in their lands to increase tree cover and help in mitigating the adverse impacts of climate change.

***NB: This forecast should be used in conjunction with the 24-hour, 5-day, 7-day, monthly outlooks, special forecasts, alerts and regular updates/advisories issued by this department.***
