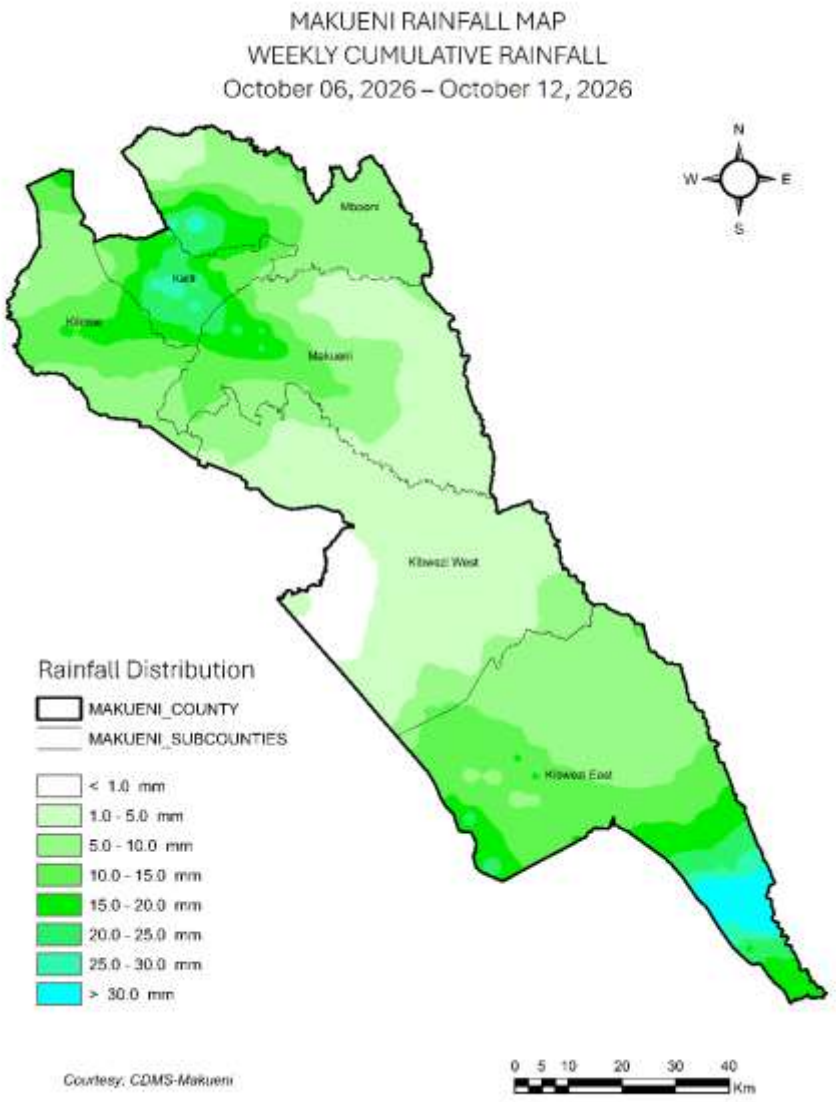
STATE DEPARTMENT FOR ENVIRONMENT AND CLIMATE CHANGE
KENYA METEOROLOGICAL DEPARTMENT
REPUBLIC OF KENYA

NOTE: Dry day <1mm. Light rains (1-5 mm). Moderate rains (5-20 mm). Heavy rains (20-50 mm). Very Heavy rains > 50 mm.



MAKUENI COUNTY WEEKLY WEATHER FORECAST

Forecast Period: October 06, 2026 – October 12, 2026

GENERAL WEATHER OUTLOOK

Makueni County is expected to experience **generally moderate rainfall during the forecast period**, with rainfall amounts varying considerably across the county. **Higher rainfall is expected over the northern and central highlands**, particularly Mbooni, Kaiti and parts of Kilome, while relatively lower amounts are expected over parts of Kibwezi West.

Daytime temperatures are expected to remain **cool to warm**, with the warmest conditions occurring mainly over the lower-elevation southeastern parts of the county. **Nighttime temperatures will generally range from cool to mild**, with colder nights possible over the higher elevations.

RAINFALL FORECAST

Rainfall intensity

- **Moderate rainfall (5–20 mm)** is expected to be the **dominant rainfall category** across much of the county.
- **Heavy rainfall (20–50 mm)** is possible in localized areas, particularly over parts of **Mbooni, Kaiti, Kilome and southeastern Makueni**.
- Areas receiving rainfall in the map's **>30 mm class** should be monitored closely. The available map does **not distinguish between 30–50 mm and >50 mm**, therefore very heavy rainfall (>50 mm) cannot be confirmed from the map.
- Relatively lighter rainfall is expected over parts of **Kibwezi West**.

County Director of Meteorological Services
(CDMS)—Makueni County

Email: swambua@meteo.go.ke info@meteo.go.ke Website: http://www.meteo.go.ke

Spatial pattern

Higher rainfall potential:
Mbooni • Kaiti • Kilome • localized southeastern areas

Moderate rainfall:
Central Makueni • Kibwezi East • surrounding areas

Lower rainfall potential:
Parts of Kibwezi West

Recommended Action Points:

- **Farmers:** Take advantage of the expected rainfall for land preparation, planting and crop establishment where soil moisture conditions are suitable.
- **Water managers:** Maximize opportunities for **water harvesting and storage**, particularly in areas expected to receive moderate to heavy rainfall.
- **County and community disaster-management teams:** Monitor localized runoff and drainage in areas forecast to receive **20 mm or more**.
- **Road and infrastructure managers:** Check drainage channels, culverts a**nd vulnerable road sections, particularly in higher-rainfall areas.**
- **Residents in low-lying areas: Remain alert to localized water accumulation** and runoff during periods of rainfall.

🌡️ MAXIMUM TEMPERATURE HIGHLIGHT

Daytime temperatures are expected to range mainly from the **Cool to Warm categories (≤25–29°C)**.

Cool conditions — ≤25°C

Expected mainly over:

- **Mbooni**
- **Kaiti**
- **Kilome**
- Higher-elevation areas

Warm conditions — 26–29°C

Expected mainly over:

- **Kibwezi West**
- **Kibwezi East**
- Southeastern and lower-elevation parts of Makueni

No significant heat signal

- **Hot (30–33°C):** Not indicated.

- **Very Hot (≥34°C):** Not indicated.

🌞 Action Points – Maximum Temperature

- **Outdoor workers and field teams:** Normal outdoor activities can generally proceed, with routine hydration maintained in the warmer southeastern areas.
- **Agricultural stakeholders:** Use the relatively moderate daytime temperatures to support field activities where rainfall and soil conditions permit.
- **Livestock keepers:** Maintain adequate access to drinking water, particularly in the warmer lower-elevation areas.

🌙 MINIMUM TEMPERATURE

Nighttime temperatures are expected to be predominantly **Cool to Mild (13–18°C)**.

Cool conditions — 13–15°C

Likely mainly over:

- **Mbooni**
- **Kaiti**
- **Kilome**
- Other elevated areas

Mild conditions — 16–18°C

Likely mainly over:

- Central Makueni
- Kibwezi West
- Parts of Kibwezi East

Localized colder conditions

Temperatures approaching **12°C or below** may occur over some higher-elevation areas

🌙 Action Points – Minimum Temperature

- **Farmers:** Monitor temperature-sensitive crops in cooler highland areas, particularly where cold nights coincide with moist conditions.
- **Livestock keepers:** Provide adequate shelter for vulnerable livestock during cooler nights.
- **Agricultural extension teams:** Monitor crop development where persistent cool and wet conditions occur.

Maximum Temperature Categories

Category	Range (°C)	Meaning
Cool	≤25	Mild daytime heat; low stress
Warm	26–29	Comfortable; suitable for activities
Hot	30–33	Intense heat; moderate stress
Very Hot	≥34	Extreme heat; high stress

Minimum Temperature Categories

Category	Range (°C)	Meaning
Cold	≤12	Chilly; frost/dew possible
Cool	13–15	Mild; minimal stress
Mild	16–18	Moderate; favorable for growth
Warm	≥19	Warm nights; limited cooling

KEY TAKEAWAYS

1. Rainfall

Moderate rainfall is expected to dominate, with localized **heavy rainfall potential** particularly over the higher-rainfall northern areas and selected southeastern locations.

2. Agriculture

The expected rainfall provides an opportunity for **crop establishment, soil-moisture improvement and water harvesting**, subject to local rainfall timing and soil conditions.

3. Flood and drainage preparedness

Although widespread extreme rainfall is not indicated, **localized heavy rainfall could generate rapid runoff, erosion and drainage problems**. Vulnerable infrastructure should therefore remain under observation.

4. Temperature

Daytime conditions will generally be **cool to warm (≤25–29°C)**, while nighttime conditions will mainly be **cool to mild (13–18°C)**.

5. Heat stress

No widespread hot or very hot conditions are forecast, with temperatures remaining below 30°C across the mapped county.

ACTION MESSAGE

🌧️ **Prepare for and utilize the expected rainfall while maintaining vigilance for localized heavy rainfall.** 🌱 **Farmers should align field activities with actual rainfall and soil-moisture conditions, while water managers should maximize water-harvesting opportunities.** 🌊 **County and community response teams should maintain readiness for localized runoff, erosion and drainage challenges.** 🌡️ **Temperatures are expected to remain generally moderate, with cooler conditions over the highlands and warmer conditions toward the southeastern lowlands.**
