MINISTRY OF ENVIRONMENT, CLIMATE CHANGE AND FORESTRY

STATE DEPARTMENT FOR ENVIRONMENT AND CLIMATE CHANGE

KENYA METEOROLOGICAL DEPARTMENT

NOTE: Dry day <1mm. Light rains (1-5 mm). Moderate rains (5-20 mm). Heavy rains (20-50 mm). Very Heavy rains > 50 mm.

MAKUENI COUNTY WEEKLY WEATHER FORECAST

Forecast Period: October 20, 2026 – October 26, 2026

GENERAL WEATHER OUTLOOK

Makueni County is expected to **experience variable rainfall conditions**, with predominantly **moderate rainfall in several areas** and localized **pockets of heavy to very heavy rainfall**. Rainfall **distribution is expected to vary** across the county, influenced partly by differences in elevation and local weather conditions.

Daytime temperatures will generally be **hot across the central and southern lowlands**, with **very hot conditions** possible in **parts of Kibwezi West and Kibwezi East**. The **northern highlands,** particularly **Mbooni, Kaiti** and **Kilome**, are expected to experience **relatively cooler conditions**. **Night-time** temperatures will **generally be cool to mild**, with **warmer nights** in some **southeastern areas**.

RAINFALL FORECAST

Overall classification: Predominantly light to moderate rainfall, with localised heavier rainfall pockets. Most areas are expected to receive about 10–30 mm range, with localised higher accumulations in parts of the highlands and Kibwezi West. Some areas, particularly in the southeastern lowlands, are expected to receive less than 1 mm or remain relatively dry.

Recommended actions:

- **Agriculture:** Farmers should use the expected rainfall to support land preparation, planting and crop establishment where soil moisture is adequate. Maintain field drainage and avoid planting in waterlogged areas.

County Director of Meteorological Services (CDMS)—Makueni County

Email: swambua@meteo.go.ke info@meteo.go.ke Website: http://www.meteo.go.ke

- **Water resources:** Households and institutions should harvest and store rainwater safely, while checking water-harvesting structures for adequate capacity and structural integrity.
- **Disaster preparedness:** County disaster management teams and local administrators should monitor areas prone to flash flooding, soil erosion and runoff, especially near seasonal rivers, streams and poorly drained settlements.
- **Infrastructure:** Clear blocked drainage channels and inspect vulnerable roads, culverts and river crossings before rainfall events.
- **Public safety:** Residents should avoid crossing flooded rivers and seasonal streams, even where water levels appear manageable.

🌡️ MAXIMUM TEMPERATURE HIGHLIGHT

Forecast: predominantly hot daytime conditions across the central and western lowlands, with cooler conditions in the northern highlands and a relatively cooler strip along parts of the eastern side of the county.

Subcounty / area	*Approx. maximum temperature*	*Category*	*Expected conditions*
Mbooni	28–30°C	Warm to Hot	Warm days, locally hot
Kaiti	28–31°C	Warm to Hot	Warm to hot daytime conditions
Kilome	28–30°C	Warm to Hot	Generally warm days
Makueni	30–33°C	Hot	Hot days; moderate heat stress possible
Kibwezi West	32–34°C+	Hot to Very Hot	Very hot conditions in some areas
Kibwezi East	27–34°C+	Warm to Very Hot	Variable conditions, with very hot inland pockets and relatively cooler eastern areas

Hot conditions are expected across much of the county. The highest temperatures are concentrated in the southern and western lowlands, especially Kibwezi West and parts of Kibwezi East. Outdoor workers, livestock keepers and other exposed populations should take precautions against heat stress, including access to drinking water, shade and reduced strenuous activity during the hottest hours.

Recommended actions:

- **Public health:** Residents should drink sufficient water, seek shade and limit strenuous outdoor activities during the hottest hours of the day.
- **Outdoor workers:** Farmers, construction workers and other outdoor workers should schedule physically demanding tasks during cooler morning or late-afternoon periods.
- **Livestock:** Livestock keepers should provide adequate drinking water, shade and well-ventilated holding areas.
- **Schools and institutions:** Ensure access to drinking water and shaded resting areas, particularly for candidates and people undertaking outdoor activities.

🌙 MINIMUM TEMPERATURE

The minimum temperature map indicates cooler nights in the northern highlands and progressively warmer nights across much of the central and southern lowlands.

Subcounty / area	*Approx. minimum temperature*	*Category*	*Expected conditions*
Mbooni	12–14°C	Cool	Cool nights
Kaiti	12–14°C	Cold to Cool	Locally chilly nights in the higher areas
Kilome	12–14°C	Cold to Cool	Cool nights, with locally colder pockets
Makueni	14–17°C	Cool to Mild	Generally cool to mild nights
Kibwezi West	16–18°C	Mild	Mild nights with moderate cooling
Kibwezi East	15–19°C	Cool to Warm	Mostly mild to warm nights, with local variation

Cool to mild nights are expected across most of Makueni County. The highlands of Mbooni, Kaiti and Kilome will generally experience cooler nights than the lower-lying areas. Warmer nights are indicated in isolated parts of the southeastern lowlands.

Recommended actions:

- **Health:** Households should ensure that vulnerable individuals, particularly young children, older persons and those sensitive to cold conditions, have suitable bedding and clothing in the cooler highlands.
- **Agriculture:** Farmers should continue routine crop monitoring and apply locally appropriate crop-management practices according to observed field conditions.
- **Livestock:** Provide appropriate overnight shelter for vulnerable young animals where necessary.

Maximum Temperature Categories

Category	Range (°C)	Meaning
Cool	≤25	Mild daytime heat; low stress
Warm	26–29	Comfortable; suitable for activities
Hot	30–33	Intense heat; moderate stress
Very Hot	≥34	Extreme heat; high stress

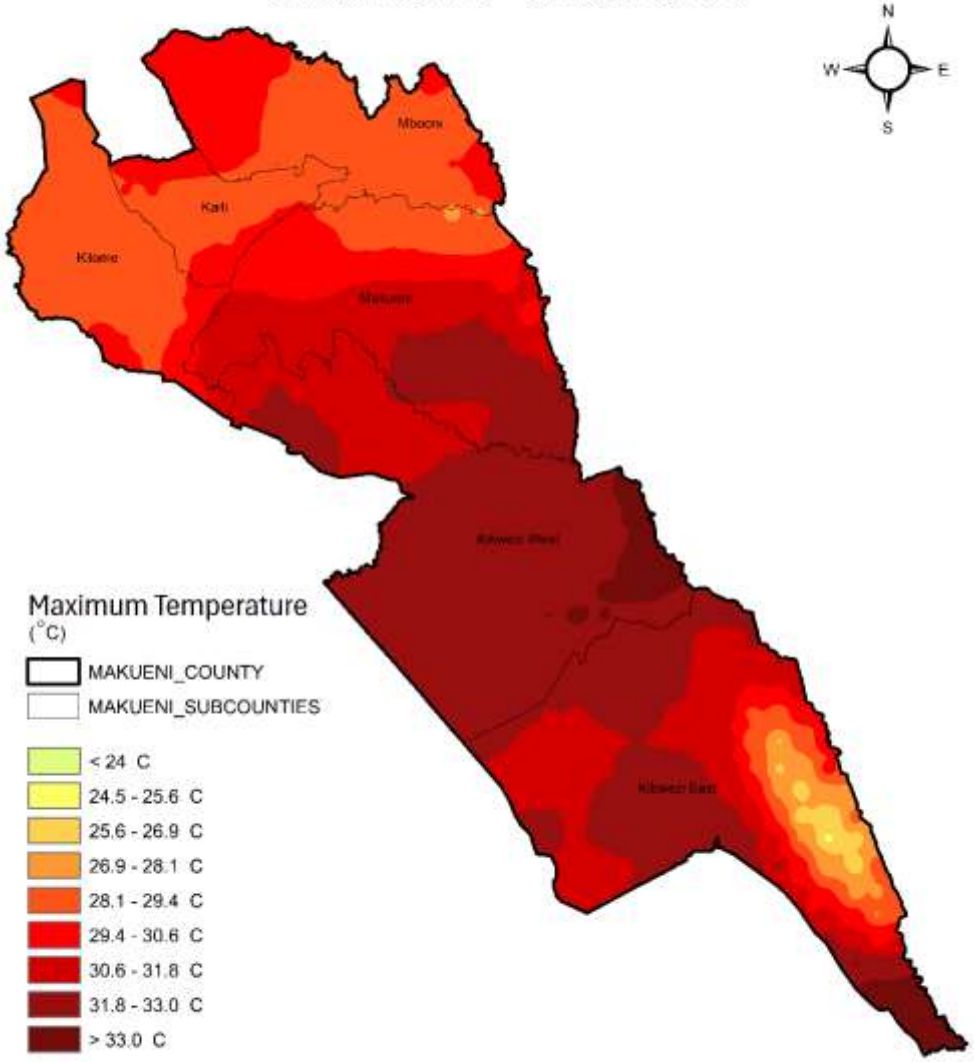

Minimum Temperature Categories

Category	Range (°C)	Meaning
Cold	≤12	Chilly; frost/dew possible
Cool	13–15	Mild; minimal stress
Mild	16–18	Moderate; favorable for growth
Warm	≥19	Warm nights; limited cooling

Spatial pattern

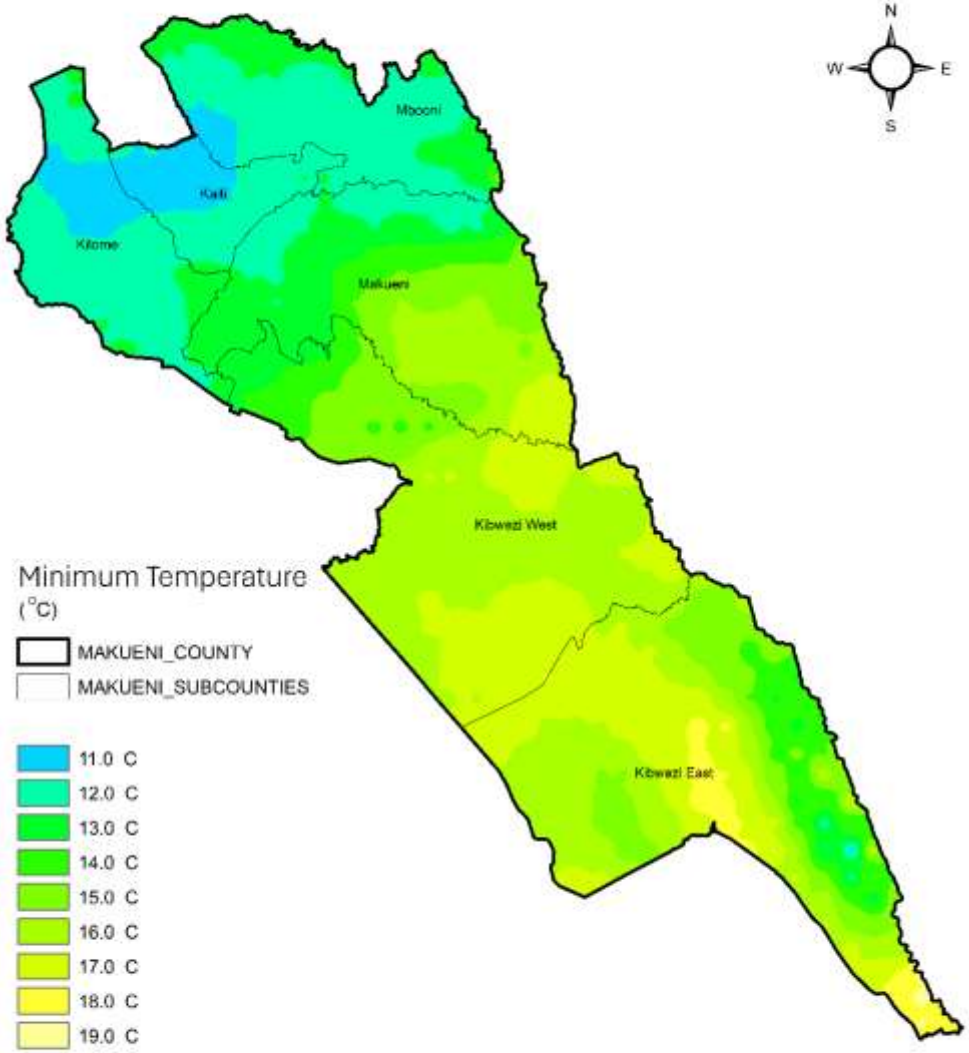

Area	*Rainfall outlook*	*Temperature outlook*	*Priority action*
Mbooni	Moderate, with localised heavy to very heavy pockets	Warm to hot days; cool nights	Monitor intense rainfall, runoff and soil erosion
Kaiti	Moderate, with localised heavier rainfall	Warm to hot days; cool nights	Maintain drainage and monitor erosion-prone slopes
Kilome	Moderate, with localised heavier rainfall	Warm to hot days; cool nights	Protect farms and roads from runoff
Makueni	Mainly moderate, locally light or heavier	Hot days; cool to mild nights	Prepare for rainfall variability and heat exposure
Kibwezi West	Mainly moderate, with localised heavy to very heavy pockets	Hot to very hot days; mild nights	Monitor runoff and take precautions against heat stress
Kibwezi East	Mainly light to moderate, with localised heavier pockets	Warm to very hot days; cool to locally warm nights	Conserve water, manage heat exposure and monitor rainfall
