KILIFI COUNTY
WEEKLY WEATHER FORECAST.

Date of issue: 2nd NOV. 2026.
Period of forecast: Tue 3rd to Mon 9th Nov. 2026.

Forecast Summary.

- Kilifi County is expected to experience **mainly cloudy conditions with sunny intervals throughout the week**. Light showers are possible in a few places.
- **Daytime maximum temperatures** are forecast to range between **30°C and 34°C**, while **night-time minimum temperatures** are expected to range between **21°C and 24°C** across the county.
- **Winds** are expected to blow mainly from the **east, southeast and east-southeast**, with speeds generally ranging from approximately **7 to 21 knots** across the county.
- **Marine Users and Fisherfolk:** Exercise caution during periods of stronger winds. Small-vessel operators should assess prevailing conditions before departure, ensure that appropriate safety equipment is available and follow official marine warnings. Activities should be postponed when conditions are unsafe.
- **Road Users**: Motorists, motorcyclists, cyclists and pedestrians should exercise caution whenever rainfall occurs. Wet and slippery road surfaces and reduced visibility may increase accident risks. Drivers should reduce speed, maintain safe following distances and avoid crossing flooded roads or swollen streams.
- **Residents and Local Authorities:** Residents, particularly those in low-lying areas and locations with a history of flooding, should remain alert during rainfall. Local authorities should monitor conditions in vulnerable areas and provide appropriate guidance if adverse weather develops.
- **Farmers and Agricultural Stakeholders**: Farmers are encouraged to monitor local weather conditions when planning planting, land preparation, pesticide application, and other farm operations. Agricultural decisions should take account of actual rainfall conditions and updated forecasts.
- **Tourism and Hospitality Sector**: Tourism operators, beach managers and outdoor recreation providers should monitor weather conditions and follow relevant safety advisories. Marine excursions and other weather-sensitive activities should be assessed against prevailing conditions before proceeding.
