# Weekly Weather forecast for Kakamega County

**Period of forecast: Tuesday 10th November 2026 to Monday 16th November 2026**

**Date of issue: Monday 9th November 2026**

## Summary

Kakamega County will have a wet week, with more rain likely than last week. Most places will get some rain every day, often accompanied by thunderstorms. Southern and south eastern parts of the county are likely to receive the most rainfall. Tuesday and Wednesday will start off dry everywhere, but many places in the county will experience moderate rain in the afternoon and light rain at night. The rain will get heavier on Thursday and Friday, with morning showers possible and heavy rain becoming widespread in the afternoon. It will become lighter at night. The rain will start to ease off on Saturday. But light morning showers and moderate rain in the afternoon will still affect many places. Sunday and Monday will see a return to dry mornings with sunny intervals. But there will still be moderate or heavy rain in many places in the afternoon and light rain at night.

Daytime temperatures will hit afternoon highs of 28°C to 30°C on most days of the coming week, so it will feel warm, but Friday and Saturday will be noticeably cooler in the heavier rain on those two days. Afternoon highs on those two days will struggle to reach 23°C to 25°C. Nights will be cool and comfortable, with dawn lows of 16°C to 18°C.

*Key to rainfall distribution symbols:*  *rain likely to fall in few places (less than 33%),*  *rain likely to fall in many places (33% -67%),*  *rain likely to fall in most places (more than 67%)*

# Commentary of County Weather Forecaster:

1. Plan outdoor activities during morning hours Tuesday, Wednesday, Sunday and Monday when there is minimal chance of rain.
2. Expect **lightning**, **showers**, **strong wind** and isolated **hailstones** in the afternoon. Stay indoors, keep dry, and keep away from tall trees and open fields to stay safe from lightning strikes, strong wind and hailstones.
3. Harvest your rainwater and store it safely for future use.
4. Seek advice from agriculture extension officers on planning farming activities in light of this forecast.

*Note: There may be differences in amount of rainfall forecasted and amount of rainfall received.*
