Hazards	 Thunderstorm	 Thunderstorm	 Thunderstorm	 Thunderstorm	 Thunderstorm	 Thunderstorm	 Thunderstorm

Key to rainfall areal distribution symbols:  rain is likely to fall in few places less than 33% of the area (0% inclusive),  rain is likely to fall in many/several places (33-67%) and  rain is likely to fall in most places (more than 67%)

Commentary of County Weather Forecaster:

- Light or moderate rainfall accompanied with lightning and thunder is likely to occur over few places occasionally spreading to several places during the week. The rain may occasionally be accompanied by strong wind and hailstones.
- Zones 3 and 4 are likely to receive more rainfall than zone 1 and 2.
- Carry out agricultural activities in consultation with agriculture extension officers.
- Water the young trees planted during this season thoroughly in the evening if it does not rain in your area.
- Harvest rain water for future use.

Note: There may be differences in amount of rainfall forecasted and amount of rainfall received.
