Biometeorological Services Division

WEEKLY BIOMETEOROLOGICAL BULLETIN (17TH JUNE-23RD JUNE 2025)

Ref No: MET/7/58/6-2025

Issue Date: 16/06/2025

PREAMBLE

Biometeorology is an interdisciplinary science of interactions between atmospheric processes and living organisms - plants, animals and human-beings. The Biometeorological Services Division collects, analyzes and interprets Meteorological and Health data in liaison with partners in the Health Sector for advisory development.

The weather information provided is aimed at guiding residents to identify and recognize the likelihood of occurrence of weather-related health diseases according to the issued advisories and take necessary action.

REVIEW FOR PREVIOUS WEEK (9^{TH} JUNE – 15^{TH} JUNE, 2025)

1.1 Rainfall

This section lists stations recorded more than 50mm total rainfall in the last 7 days. Stations such as Kakamega, Kericho, Kisii, Mtwapa, Mombasa, Malindi, Kitale and Nyahururu recorded total weekly rainfall above 50mm. This is shown in Table 1 below.

Table 1:

Station	Total weekly	rainfall
	amounts	
Malindi Met	103.6mm	
Lamu Met	76.7mm	
Msabaha Met	65.9mm	

1.2 High Temperatures

This section lists stations that recorded average temperatures exceeding **35°C** in the last **7 days**. Station such as **Mandera** and **Lodwar** recorded average weekly temperatures exceeding **35°C** as shown in Table 2 below.

Table 2:

Station	Average weekly maximum temperature
Mandera Met	36.3°C
Lodwar Met	35.6°C

1.3 Low Temperatures

This section lists stations that recorded average temperatures **not** exceeding **10°C** in the last **7 days.** Station such as **Nyandarua** (**Nyahururu**) recorded lower temperatures. The station recorded an average weekly temperature **not** exceeding 10°C as shown in Table 3 below.

Table 3:

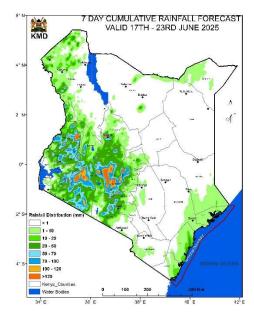

Station	Average weekly minimum temperature.
Nyahururu Met	7.2°C

1.4 High Winds

This section list stations that recorded winds with speeds of more than 25 knots (12.9 metres per sec) in the last 7 days. This was recorded in Marsabit Met station.

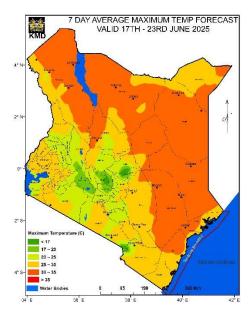

2.0 FORECAST FOR (17^{TH} JUNE -22^{ND} JUNE, 2025) Rainfall

Rainfall amounts exceeding **50mm** is to be expected over some parts of **Nyandarua**, **Kericho**, **Bomet**, **Kitale**, **Vihiga** and **Kisii** counties during the forecast period of Tuesday 17th June 2025 to Monday 22nd June 2025.

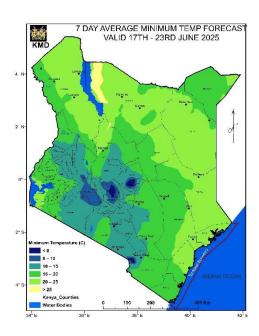

High Temperature

Temperatures exceeding **35°C** is to be expected in parts of **Mandera** County during the forecast period of Tuesday 17th June 2025 to Monday 22nd June, 2025.

Low Temperature

Temperature of less than **10°C** is expected over Counties like **Nyandarua** (**Nyahururu**), **Kitale** and **Kericho** Counties during the forecast period of Tuesday 17th June 2025 to Monday 22nd June, 2025.

Winds

Winds of more than 25 knots (12.9m/s) are expected over parts of Marsabit, Nyandarua, Isiolo, Garissa, Samburu, Mandera, Wajir, Lamu, Mombasa and Kilifi (Malindi, Msabaha Mtwapa) Counties during the forecast period of Tuesday 17th June 2025 to Monday 22nd June, 2025.

3.0 Meteorological Advisory on Weather-Related Risks

Residents are encouraged to monitor the following weather conditions and their potential impacts:

1. Rainfall

- Forecast: Some areas are expected to receive more than 50 mm of rainfall during the week.
- Implications: Increased risk of **flooding** in low-lying areas and along riverbanks. Higher likelihood of **waterborne diseases** due to contaminated water sources.
 - Recommendation:
- 1. Use clean, boiled, or treated water for drinking and cooking.
- 2. Stay Informed: Keep up with updates from the Kenya Meteorological Department regarding rainfall forecasts and advisories.

2. High Temperatures

Forecast: Anticipated temperatures may exceed 35°C in several counties.

Implications: High temperatures can lead to heat stress and dehydration.

Recommendations: Limit outdoor activities during peak heat hours (10 AM - 4 PM). Stay hydrated by drinking plenty of water. Dress in light, breathable clothing and seek shade or air-conditioned spaces when possible.

3. Cold Weather Conditions

Forecast: Some areas may experience temperatures below 10°C.

Implications: Increased cases of respiratory diseases such as flu, pneumonia, and asthma

attacks. Children, the elderly, and individuals with chronic illnesses are at higher risk.

Recommendations: Dress warmly and limit exposure to cold, especially for vulnerable populations.

4. Strong Winds

Forecast: Winds exceeding 25 knots (12.9 m/s) are expected in specific regions.

Implications: High winds can lead to dust storms

Recommendations. Be aware of potential respiratory issues due to airborne particles.

Conclusion

Residents are encouraged to take proactive measures to safeguard themselves and their communities against the anticipated weather conditions. For accurate and timely updates, this advisory should be used in conjunction with the daily forecasts issued by the Kenya Meteorological Department.

Stay Safe and Informed.

Dr Gikungu

DIRECTOR OF KENYA METEOROLOGICAL DEPARTMENT
