	Miambani	<1mm	Partly cloudy	Partly cloudy	Partly cloudy	Partly cloudy	Partly cloudy	Partly cloudy	Partly cloudy		

1.2 Review for June 2025

June 2025 marked the beginning of cold season across Kitui county. Most parts of the county remained generally dry with intermittent cool and Partly cloudy conditions and occasional light rains over high ground areas. Both daytime (Maximum) and night time (Minimum) temperatures were warmer than normal over most parts of the county. Strong southerly to south-easterly winds with speeds exceeding 25 knots (12.86 m/s) were experienced occasionally over the county during the month.

1.3 Outlook for July 2025

The weather forecast for July 2025 is based on regression of Sea Surface Temperatures (SSTs), SST gradients and the expected evolution of global SST patterns as well as upper air circulation patterns as illustrated in the rainfall climatology map for July in Annex II. The month of July marks the peak of the June-July-August cold season over Kitui county. The county is expected to remain generally dry and Sunny. Cool and Partly cloudy conditions with occasional light rains over high ground areas is expected over the county.

1.4 PART II: FURTHER ADVISORIES

SUMMARY ABOUT THE WEEKLY FORECAST:

We expect partly Partly cloudy condition during the nights, chilly and Partly cloudy mornings breaking into sunny intervals in the afternoons with a small chance (probability <33%) of drizzle over the high ground areas. Maximum temperatures are expected to range from 22°C - 34°C, while minimum temperatures are expected to range from 13°C - 23°C. Strong southerly to south-easterly winds with speeds exceeding 25 knots (12.86 m/s) are expected to persist in most parts of the County. *Community members advised to inculcate the culture of being “weather – ready”, “climate – smart” and “water – wise” as we navigate the unfamiliar and chaotic environment of a changing climate. This will help them adapt to a changing climate while at the same time mitigating the adverse effects of Climate Change and Variability, hence becoming more resilient to the vagaries of Climate Change.* In light of this weather forecast, farmers are also advised to consult with respective local extension officers from the County Ministry of Agriculture and Livestock at ward level for more advice on the best farm practices.

Note: 1 mm of rainfall is equivalent to 1 litre of rainfall per square meter.

KEY OF SCIENTIFIC WORDS USED

Rainfall categories	
Range	Category
<5 mm	Light
5 - 20mm	Moderate
20 - 50mm	Heavy
>50mm	Very heavy
Rainfall coverage	
Term	Meaning
Most Places	Between 66% and 100%
Several Places	Between 33% and 66%
Few Places	Below 33%
Ushauri wa Idara ya Utabiri wa Hali ya Hewa: Msimu wa baridi wa June-July-August (JJA) unaendelea katika Kaunti ya Kitui. Wakulima wanashauriwa waendeleo kuvuna chakula chao na napia kuianika vizuri kwa jua hili kuepukana na athari za sumu kuvu yaani 'aflatoxin'. Pia wanashauriwa wanywe maji moto kwa wingi na kuvaa nguo za nje zinazoleta joto mwilini kama vile kanzu, koti, kofia, mitandio (scarves) na glovu au shati (mittens), masikio (earmuffs), suti za muungano (union suits) na pia soksi joto.
