1. PART II: Further Advisories.

(i) Community members advised to inculcate the culture of being "weather – ready", "climate smart" and "water – wise" as we navigate the unfamiliar and chaotic environment of a changing climate. This will help them adapt to a changing climate and mitigate the adverse effects of climate change.

(ii) Farmers advised to consult the nearest Ward Agricultural Officer to get any further agro-weather and agronomy advisories they may require from time to time as the Long Rains 2024 season sets in.

(iii) Farmers advised to make good use of the seasonal rains to undertake massive water harvesting as well as growing trees in their lands in order to help mitigate the adverse effects of climate change and also to increase forest cover.

NB: This forecast should be used in conjunction with the 24-hour, 5-day, 7-day, monthly outlooks, special forecasts and regular updates/advisories issued by this department (KMD).
