Biometeorological Services Division

WEEKLY BIOMETEOROLOGICAL BULLETIN (2ND JULY–8TH JULY, 2024)

Ref No: KMD/MM/07-2024

Issue Date: 01/07/2024

1.0 PREAMBLE

Biometeorology is an interdisciplinary science of interactions between atmospheric processes and living organisms - plants, animals and human-beings. The Biometeorological Services Division collects, analyzes and interprets Meteorological and Health data in liaison with partners in the Health Sector for advisory development.

The weather information provided is aimed at guiding residents to identify and recognize the likelihood of occurrence of weather-related health diseases according to the issued advisories and take necessary action.

Summary

During this season, we are expecting unusually low temperatures. Residents should take necessary precautions to prevent cold-related illnesses.

REVIEW FOR LAST WEEK (24TH JUNE, 2024– 30TH JUNE, 2024)

1.1 High Rainfall

This section lists stations recorded more than 50mm total rainfall in the last 7 days. This is shown in Table 1 below.

Table 1:

Station	Total weekly Rainfall
Eldoret Airport	80.1mm
Kakamega Met	76.9mm

1.2 High Temperatures

This section lists stations that recorded average temperatures exceeding 35°C in the last 7 days. Stations recorded average temperatures not exceeding 35°C in the last 7 days.

1.3 Low Temperatures

This section lists stations that recorded average temperatures below 10°C in the last 7 days. This is shown in Table 2 below.

Table 2:

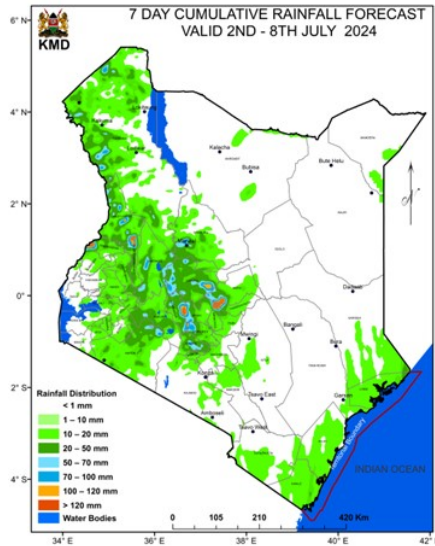

Station	Average weekly Minimum Temperature
Nyahururu Met	6.6°C

1.3 High Winds

This section lists stations that recorded winds with speeds of more than 25 knots (12.9 metres per sec) in the last 7 days. This was recorded in Marsabit station.

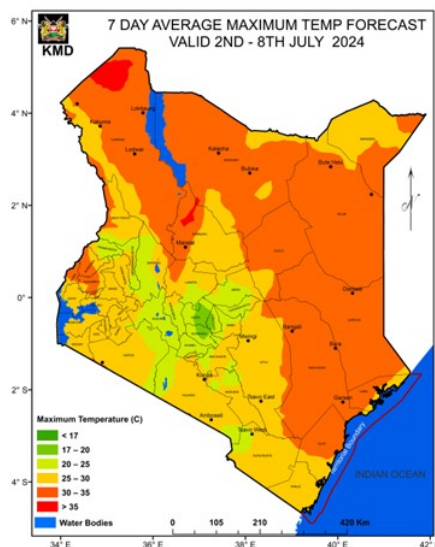

2.0 FORECAST FOR 2ND JULY, 2024– 8TH JULY, 2024

a) Rainfall

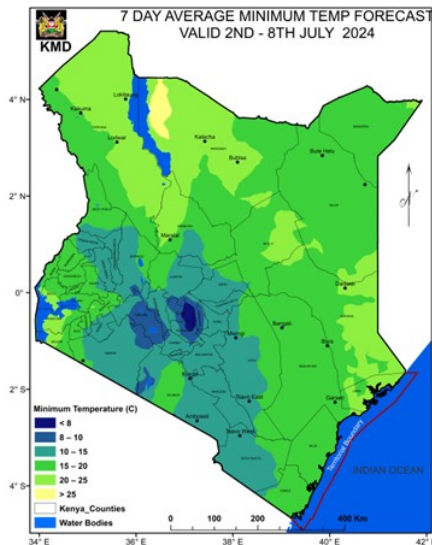

Rainfall amounts exceeding 50mm are expected over parts of Trans-Nzoia, Bungoma, Nyandarua, Elgeyo Marakwet, and Nyeri counties during the forecast period (Tuesday 2nd July 2024 to Monday 8th July 2024).

b) High Temperature

Maximum Temperatures exceeding 35°C is expected over parts of Turkana (Lodwar) county during the forecast period (Tuesday 2nd July 2024 to Monday 8th July, 2024).

c) Low Temperature

Minimum temperature of less than 10°C is expected over parts of Nyandarua (Nyahururu), Nakuru Kajiado, Narok, Nyeri, Kirinyaga, and Murang'a counties during the forecast period (Tuesday 2nd July 2024 to Monday 8th July 2024).

d) Winds

Winds of more than 25 knots (12.9m/s) are expected over parts of Turkana (Lodwar), Mandera, Marsabit, Lamu, Wajir, Garissa, Mombasa, Isiolo, and Kilifi (Mtwapa, Malindi, Msabaha) Counties during the forecast period (Tuesday 2nd June 2024 to Monday 8th July 2024).

3.0 Advisories

i) Areas expected to receive more than 50 mm of weekly total rainfall have a high likelihood of occurrence of waterborne diseases (e.g. diarrhea) and Vector borne diseases (e.g. Malaria), especially in areas with poor drainage. Residents are advised to be on the lookout for such diseases and take necessary action.

ii) Residents living in areas expected to experience temperatures of more than 35°C have a high risk of being infected with skin diseases e.g. skin rash.

iii) Areas expected to experience less than 10°C have a high likelihood of occurrence of cold weather diseases. e.g. Asthma, pneumonia, common cold and flu. Residents are advised to be on the lookout for such diseases and take necessary action.

iv) Winds of more than 25 knots (12.9m/s). These winds are strong enough and able to blow dust especially over bare grounds. The blown dust may increase the risk of respiratory infections e.g. Cold and flu diseases. These diseases are quite common during the dry weather conditions. Residents are advised to be on the lookout for such diseases and take necessary protective measures.

N. B: This forecast is to be used together with the daily (24-hour) forecast issued by this Department.

Mr. Kennedy Thiong'o

FOR DIRECTOR OF KENYA METEOROLOGICAL DEPARTMENT
