Biometeorological Services Division

WEEKLY BIOMETEOROLOGICAL BULLETIN (5TH MARCH–11TH MARCH, 2024)

Ref No: KMD/MM/03-2024

Issue Date: 04/03/2024

1.0 PREAMBLE

Biometeorology is an interdisciplinary science of interactions between atmospheric processes and living organisms - plants, animals and human-beings. The Biometeorological Services Division collects, analyzes and interprets Meteorological and Health data in liaison with partners in the Health Sector for advisory development.

The weather information provided is aimed at guiding residents to identify and recognize the likelihood of occurrence of weather-related health diseases according to the issued advisories and take necessary action.

REVIEW FOR LAST WEEK (26TH FEBRUARY, 2024– 3RD MARCH, 2024)

1.1 High Rainfall

This section lists stations recorded more than 50mm total rainfall in the last 7 days. This is shown in Table 1 below.

Table 1:

Station	Total weekly Rainfall
Kericho Met	112.3mm
Eldoret Met	106.9mm
Kabete Met	88.9mm
Kisumu Met	83.5mm
Voi Met	78.1mm
Meru Met	68.6mm
Kisii Met	61.9mm
Kitale Met	59.2mm
Kakamega Met	59.0mm
Kitui Met	55.8mm

1.2 High Temperatures

This section lists stations that recorded average temperatures exceeding 35°C in the last 7 days. This is shown in Table 2 below.

Table 2:

Station	Average weekly maximum temperature
Mandera Met	39.2°C
Garissa Met	38.6°C
Lodwar Met	37.6°C

1.3 Low Temperatures

This section lists stations that recorded average temperatures below 10°C in the last 7 days. This is shown in Table 3 below.

Table 3:

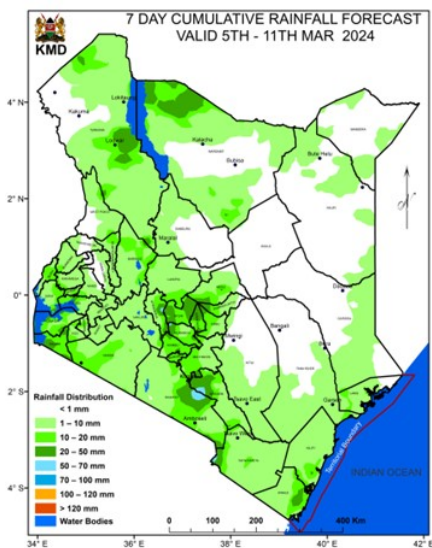

Station	Average weekly Minimum Temperature
Nyahururu Met	9.6°C

1.4 High Winds

This section list stations that recorded winds with speeds of more than 25 knots (12.9 metres per sec) in the last 7 days. This was recorded in Marsabit met station.

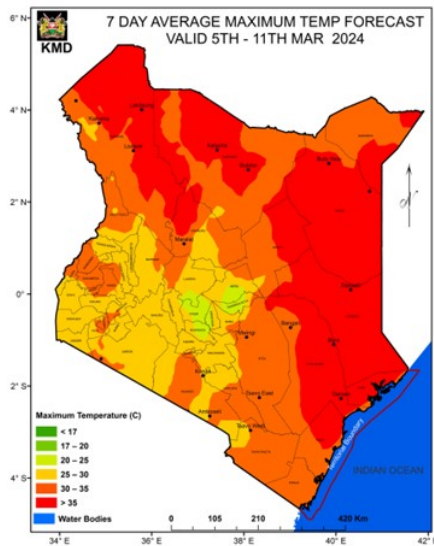

2.0 FORECAST FOR 27TH FEBRUARY, 2024– 4TH MARCH, 2024

a) Rainfall

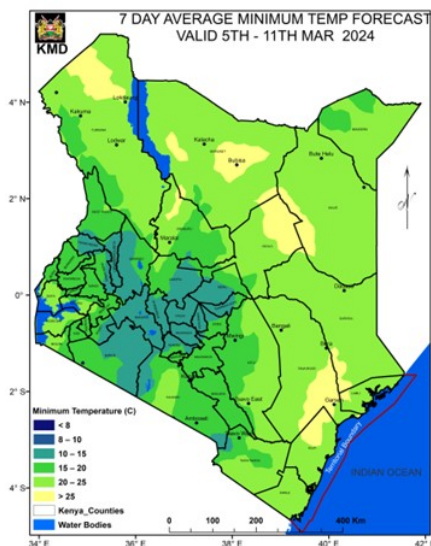

Rainfall amounts exceeding 50mm is expected over parts of Kajiado, Kericho, Kisii, Migori, Kericho, Nyandarua and Nyeri counties during the forecast period (Tuesday 5th March, 2024 to Monday 11th March, 2024).

b) High Temperature

Maximum Temperatures exceeding 35°C is expected over parts of Turkana (Lodwar), Garissa, Wajir and Mandera Counties during the forecast period (Tuesday 5th March, 2024 to Monday 11th March, 2024).

c) Low Temperature

Minimum temperature of less than 10°C is expected over parts of Nyandarua (Nyahururu) county during the forecast period (Tuesday 5th March, 2024 to Monday 11th March, 2024).

c) Winds

Winds of more than 25 knots (12.9m/s) are expected over parts of Turkana (Lodwar), Marsabit, Eldoret, Wajir and Lamu Counties during the forecast period (Tuesday 5th March, 2024 to Monday 11th March, 2024).

3.0 Advisories

i) Areas expected to receive more than 50 mm of weekly total rainfall have a high likelihood of occurrence of waterborne diseases (e.g. diarrhea) and Vector borne diseases (e.g. Malaria), especially in

areas with poor drainage. Residents are advised to be on the lookout for such diseases and take necessary action.

ii) Residents living in areas expected to experience temperatures of more than 35°C have a high risk of being infected with skin diseases e.g. skin rash.

iii) Areas expected to experience less than 10°C have a high likelihood of occurrence of cold weather diseases. e.g. Asthma, pneumonia, common cold and flu. Residents are advised to be on the lookout for such diseases and take necessary action.

iv) Winds of more than 25 knots (12.9m/s). These winds are strong enough and able to blow dust especially over bare grounds. The blown dust may increase the risk of respiratory infections e.g. Cold and flu diseases. These diseases are quite common during the dry weather conditions. Residents are advised to be on the lookout for such diseases and take necessary protective measures.

N. B: This forecast is to be used together with the daily (24-hour) forecast issued by this Department.

Kennedy Thiong'o
