Biometeorological Services Division

WEEKLY BIOMETEOROLOGICAL BULLETIN (2ND APRIL–8TH APRIL, 2024)

Ref No: KMD/MM/04-2024

Issue Date: 01/04/2024

1.0 PREAMBLE

Biometeorology is an interdisciplinary science of interactions between atmospheric processes and living organisms - plants, animals and human-beings. The Biometeorological Services Division collects, analyzes and interprets Meteorological and Health data in liaison with partners in the Health Sector for advisory development.

The weather information provided is aimed at guiding residents to identify and recognize the likelihood of occurrence of weather-related health diseases according to the issued advisories and take necessary action.

REVIEW FOR LAST WEEK (25TH MARCH, 2024–31ST MARCH, 2024)

1.1 High Rainfall

This section lists stations recorded more than 50mm total rainfall in the last 7 days. This is shown in Table 1 below.

Table 1:

Station	Total weekly Rainfall
Kangema Met	96.4mm
Voi Met	70.5mm
Kakamega Met	69.8mm
Kisii Met	51.5mm
Embu Met	51.4mm
Suba Met	50.1mm

1.2 High Temperatures

This section lists stations that recorded average temperatures exceeding 35°C in the last 7 days. This is shown in Table 2 below.

Table 2:

Station	Average weekly maximum temperature
Mandera Met	38.9°C
Lodwar Met	37.8°C
Garissa Met	37.2°C

1.3 Low Temperatures

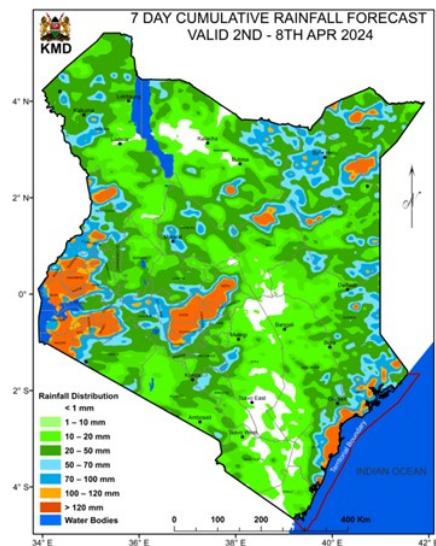

This section lists stations that recorded average temperatures below 10°C in the last 7 days. All stations recorded more temperatures exceeding 10°C.

1.4 High Winds

This section list stations that recorded winds with speeds of more than 25 knots (12.9 metres per sec) in the last 7 days. This was recorded in Marsabit met station.

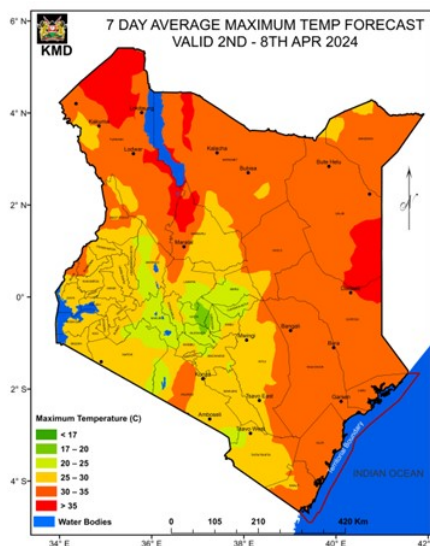

2.0 FORECAST FOR 2ND APRIL, 2024– 8TH APRIL, 2024

a) Rainfall

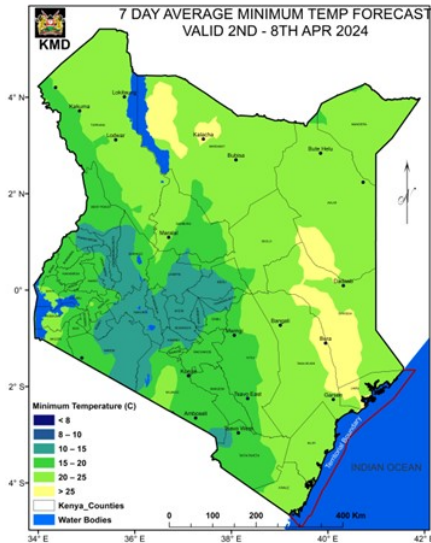

Rainfall amounts exceeding 50mm is expected over parts of Kakamega, Bungoma, Busia, Siaya, Kericho, Migori, Nyamira, Bomet, Nyeri, West Pokot, Mandera, Kiambu, Murang'a, Lamu, Kitale, Kisii, and Kilifi counties during the forecast period (Tuesday 2nd April, 2024 to Monday 8th April, 2024).

b) High Temperature

Maximum Temperatures exceeding 35°C is expected over parts of Turkana (Lodwar), Wajir and Samburu, Counties during the forecast period (Tuesday 2nd April, 2024 to Monday 8th April, 2024).

c) Low Temperature

Minimum temperature of less than 10°C is expected over parts of Nyandarua (Nyahururu) county during the forecast period (Tuesday 2nd April, 2024 to Monday 8th April, 2024).

c) Winds

Winds of more than 25 knots (12.9m/s) are expected over parts of T Marsabit County during the forecast period (Tuesday 2nd April, 2024 to Monday 8th April, 2024).

3.0 Advisories

i) Areas expected to receive more than 50 mm of weekly total rainfall have a high likelihood of occurrence of waterborne diseases (e.g. diarrhea) and Vector borne diseases (e.g. Malaria), especially in areas with poor drainage. Residents are advised to be on the lookout for such diseases and take necessary action.

ii) Residents living in areas expected to experience temperatures of more than 35°C have a high risk of being infected with skin diseases e.g. skin rash.

iii) Areas expected to experience less than 10°C have a high likelihood of occurrence of cold weather diseases. e.g. Asthma, pneumonia, common cold and flu. Residents are advised to be on the lookout for such diseases and take necessary action.

iv) Winds of more than 25 knots (12.9m/s). These winds are strong enough and able to blow dust especially over bare grounds. The blown dust may increase the risk of respiratory infections e.g. Cold and flu diseases. These diseases are quite common during the dry weather conditions. Residents are advised to be on the lookout for such diseases and take necessary protective measures.

N. B: This forecast is to be used together with the daily (24-hour) forecast issued by this Department.

Dr Gikungu

DIRECTOR OF KENYA METEOROLOGICAL DEPARTMENT
